FIRST YEAR — SUNDAY, 4 OCTOBER 2026 — THE SUNDAY EDITION — FREE, FOREVER — EVERY CLAIM LINKED

The Treasury secretary told a House committee the department is examining whether it needs Congress at all to audit the $5,000 the president promised adults for keeping Congress Republican, in the same week 750,000 people lost their health coverage with no vote required.

PHOTO: TRUMP'S ONE BIG BEAUTIFUL BILL IS STARTING TO BITE BEFORE THE MIDTERM ELECTIONS (PHOTO VIA THE NEW YORK TIMES)

BY MITCH — *Investigations*

Follow the paperwork with me. It begins, as these things do, at a convention.

At the party's midterm convention in Dallas, the president told the room that every American adult would receive $5,000 if Republicans keep control of Congress in November. The Hill printed Monday that he had said Sunday, outside Air Force One, that the checks will "happen 100 percent," comparing them to the $1,776 checks that went out to U.S. service members. Three days of his own party then performed an audit.

Friday, Senator Susan Collins called the proposal "extraordinarily costly" observing that "the proposed $5,000 dividend would not have an income cap." The same day The Hill reported that Bret Baier had pressed Texas Attorney General and Senate nominee Ken Paxton, on Thursday's show, on whether the $5,000 would actually be paid. Paxton's campaign told Baier it would be "fully funded by tariffs," then declined to say how much tariff revenue the campaign expects, or how it would be distributed.

The Week

27 SEPTEMBER – 3 OCTOBER 2026 · RANKED BY THE WIRE

STORY	OUTLETS	HEADLINES	TMS
The contractor planning the next war *Sunday chair: Sterling*	56	292	1287
The Cornell fraternity rape case runs straight to chair *Sunday chair: Mort*	29	33	151
The fifth botched execution *Sunday chair: Ruth*	25	21	99
The $5,000 promise and $90 check *Sunday chair: Chip*	22	15	137
The consulates shut before Brasil's vote *Sunday chair: Lou*	17	20	71
The bombing rescheduled for after midterms *Sunday chair: Mort*	16	1	80
The $5,000 dividend and 750,000 dropped *Sunday chair: Mitch*	16	1	80
The $38 billion war at the pump *Sunday chair: The Wrecking Crew*	16	1	80

Outlets are distinct sources across the house's receipts; versions are how many times the house wrote it. The desks divide the list; a story the house runs straight is counted and not joked.

THE WEEK'S WORDS

Beautiful · Drain The Swamp · Liberation Day · Nasty · Trust · The Greatest · Mexico Will Pay

TAGS TUESDAY

Asked Xi whether China would like to buy American weapons, says his own ambassador. The next day: "I've never heard of that one." Then: "maybe it's a good idea."

The full sec., transcript: the ambassador as Fog Seven-Sunday, Sept. 27 — "He actually asked President Xi, would he like to buy items, at one point"; the Xi read to translate by the 29th — "we didn't discuss that" — and, in the same breath, "we do make better equipment than them, so maybe it's a good idea." The offer, the denial and the re-offer stand on the ledger. China still has the pandas.

THE WORD

$10 – 01 OCTOBER 2026

On who pays

DEMOCRAT — REPUBLICAN

$46.5 BILLION — **MEXICO WILL PAY**

"I'm just going to read the payers, in order. Congress, 2009: one point three seven five billion, about fifty-five adds. The Treasury forfeiture fund: six hundred one billion. Countering money: up two to and a half billion. Military construction, not of Congress's bills: Congress — again, last count forty-six and a half billion, available through 2029."

Pentagon moves troops out of the hemisphere where it claims no oil and into the one where it has claimed 35 percent, then seats a contractor with billions of dollars in military contracts on the body planning the future of war

Los Angeles taxed housing to build more of it, and lost thousands of homes and construction jobs instead.

BY RUTH — *The Money Desk*

Los Angeles keeps a ledger with two columns that are supposed to move together: the tax collected on home sales over five million dollars, and the housing supply that tax exists to grow. The second column is the subject of this correction.

The stated purpose, per the record, is simple. Tax homes over five million dollars. Use the money to build more homes. Reconcile that purpose against the finished product and the two columns do not move together. Thousands of homes, gone. Thousands of construction jobs, gone with them. That is

US pledges 'full cooperation' investigating Marine murder arrest, its third on this island in twenty years.

BY SAL — *Staff Writer*

A Marine, 20, sat in an Okinawa jail this week on suspicion of robbing and murdering a Japanese woman, Anna Yagi, 30, at a hotel. The U.S. ambassador's office said it was "providing full cooperation with the investigation," which is the exact temperature Washington keeps on hand for a killing like this: warm enough to sound engaged, cool enough to commit to nothing. That same week, Japan's prime minister, Sanae Takaichi, registered a protest with the United States, and the word doing the heavy lifting in the wire reports was "threatened" — the one "threatened to revive tensions over the American military presence," as if the tension on Okinawa were a dormant thing that needed waking rather than a thing that never left.

It never left because this is not the first time. In June of 2016, a U.S. Marine veteran working as a civilian contractor was arrested for raping and killing a 20-year-old woman on the island,

SAL READS THE FRONT

"On one page it reads as a ledger. Treasury is examining whether it needs Congress to mail the five thousand dollars the president promised adults for keeping the House, in a week 750,000 people lost coverage with no vote required. The checks require a vote. The Pentagon moved troops out of the hemisphere where it claims no oil and into the one where it claims thirty-five percent of something unnamed, then seated a contractor with billions in military contracts on the body planning the next war. Tennessee hired a prison chief with four botched executions in the file, got the fifth Wednesday and the resignation Saturday, and the Justice Department spent that same week asking a judge to restore its pron ban on grounds of professionalism. The checks were ninety dollars, installment one, no date and no figure on installment two. A co-pilot Oman Air grounded as a security risk in 2024 was flying 174 people toward Tel Aviv with a crash axe, and the president's response was a job to the plumber who stopped the plane. The rule against scheduling ordnance around a ballot died Sunday; the bombing moved to after the midterms. The House went home a day early for seven weeks without voting on a war its own budget office prices at $38 billion, with $121 billion in added energy costs charged to households. Then half-price beer filled Neyland for a stadium speech for a bill The Nation says threatens the labor rights of the athletes on the field below. They tell you there is no money. The beer was fifty percent off and the check was ninety dollars."

— Sal

CHIP READS THE FRONT

"I will take them in order. One: Treasury is examining whether the five thousand needs Congress at all, which is efficiency, and 750,000 people came off their health coverage the same week with no vote required — two things that happened without a vote, one of which we are proud of. Strike that. Both are process. Two: we moved troops out of the hemisphere where we claim no oil into the one where we claim thirty-five percent, which is a big number, and seated a contractor holding billions in military contracts on the body planning the future of war. Three: Tennessee hired a corrections chief with four botched executions in the file, got the fifth Wednesday and the resignation Saturday, and Justice asked the judge who struck the press ban to restore it on grounds of professionalism. Four: the ninety dollars went out, installment one, and I am not putting a date or a figure on installment two from this podium. Five: the co-pilot Oman Air grounded as a security risk in 2024 was aboard with a crash axe and 174 people, and the president offered the plumber who stopped them a job. Six and seven: the bombing moved to after the midterms and the House went home a day early for seven weeks without a vote on the war — thirty-eight billion, a hundred twenty-one billion in energy charged to households — so nobody voted, so nobody can say we — the record is clean. Eight: half-price beer, a full stadium by kickoff, and a bill up Monday that The Nation says threatens the labor rights of the athletes. All of it said out loud, from this podium."

▼ THE SHORT VERSION

typed by Dot

WHAT HAPPENED. A U.S. Marine was arrested in Okinawa on suspicion of robbing and murdering a Japanese woman at a hotel.

WHO GETS PAID. The receipts name no buyer yet.

WHAT SLIPS. Japan's leverage over the American military presence it hosts slips a little further each time a killing there draws a protest and the base goes on exactly as before.

WHAT'S NEXT. If the pattern holds, this protest changes nothing about the basic presence; that is what Okinawa got after the 2016 Marine arrest, when fifty thousand people marched in Naha and the base stayed open the next day regardless.

Go to judges 'full cooperation' investigating Marine murder arrest, its third on this island in twenty years. — Volume, by Sal. The whole front, short, and the precedents, on 58.

Four botched executions followed Frank Strada from Arizona before Tennessee hired him to run its prisons. That isn't a background check, it's a receipt stamped paid in advance. Because the same governors who denied Christa Pike clemency picked the lawyer now reviewing why she's still alive, and because that lawyer reports to the governor's office and not to you, the only signature left on this file is the one you put on a ballot for governor.

Pentagon moves troops out of the hemisphere where it claims no oil and into the one where it has claimed 35 percent, then seats a contractor with billions of dollars in military contracts on the body planning the future of war

By STERLING
THE UNVEILED STAR

"With Elon Musk's Return to Washington, Possible Conflicts of Interest Resurface", 3 October 2026 (REPOSTED THE NEW YORK TIMES — THE UNVEILED STAR)

AS IT RAN IN THE PRINT

Thirty-five percent of what? The filing declines to supply the noun. Thirty-five percent, and the rest is yours to work out. Hold the figure, because on October 3, in the morning, a filing had Hegseth moving troops out of Europe, where the Pentagon claims no oil stake, and into the hemisphere where it claims thirty-five percent. Out of the one, into the other. You would like to call that strategy. It is a usufruct — the fruit of a field a man does not hold the title to — and troops are what one posts along the fence.

The thing itself was done in daylight. August 28: Congress was called upon to stop what one filing called, in its own headline, "Yet Another Trump Grift," the takeover of Venezuela's oil fields. August 30: the president described that same oil as set to replenish United States reserves, in language a filing called mobster. By September 1 the question had narrowed to one headline asking dead or theft at gunpoint. September 11: Fox News quoted a top official crediting a thirty-minute military operation with unlocking the windfall. Sixty-five billion barrels. Three minutes … which is handsome, as hourly rates go.…

[cont'd] Someone paid for the half-hour, and it was not the department. September 15: the Congressional Budget Office put Defense Department spending on the Iran war at $38 billion through the end of July, and called that estimate conservative. September 17: Moody's Analytics put the war's cost to the average American household at $1,760, and extra United States consumer spending on energy alone at $121 billion. On September 4 diesel reached $5.85 the gallon, an all-time high. On August 31 gasoline stood at $4.08, ninety cents above the year before. Matt Bell, who farms in North Yorkton and raced for the president, told CBS on September 18 that farmers were "sold a bill of goods," and, "I can't stay in business."

From August 27, a mandated filing with the Office of Government Ethics: more than 1,000 stock transactions in June, among them thousands of dollars in energy companies taking record profits from the war. Two filings. One quarter.

An accounting was requested, and the week disposed of the request twice. September 3: the Wall Street Journal reported Middle East deployments extended between 2 and 3 percent of 50,000 troops kept in the region "in part to give the president flexibility on next steps." Flexibility. The president's, not the household's. September 17: every Senate Democrat but Fetterman signed an open letter pressing Hegseth for a cost breakdown. Largely symbolic, as the item itself allowed.

October 1, and from Hegseth: no hoardon, no weirdos, no wimps. The same October 3, the department opened its new Office of Religious Affairs. The one department, the one day, and no tension reported between the two.

At least five people were killed and 68 injured when the United States bombed a wedding party at a private home in Kuhestak, in Hormozgan province, reported September 2. On September 17 a United Nations fact-finding mission found reasonable grounds to believe the United States committed war crimes in two airstrikes inside Iran; the strike on Minab killed 123 children.

Which leaves the chair. The New York Times, October 3: "The founder of SpaceX, with billions of dollars in military contracts, joins several other defense industry executives on a Pentagon advisory board."

Tennessee hired a prison chief with four botched executions in the file, got the fifth on Wednesday and the resignation on Saturday; the Justice Department spent the same week asking the judge who struck its press ban to restore it on grounds of professionalism.

May 4, 2022, 7:12 AM

The chair's still in Tennessee's living-last-meal room, after Wednesday's fifth. The room's gone. Photo: Jon

The file came first. Lawyers for Christa Pike counsel first botched execution in Tennessee's Death Row investigation took two states since 2022. Four of those were botched. The fifth was the one that ended the state's executions, and all four were on the books before Tennessee hired Hinds to run its prisons. The New York Times reported Wednesday that Hinds went through anyway. That is the first entry on his. Hinds's résumé, as filed with Tennessee's personnel office in January, presented Wednesday night with two injections of pentobarbital, each of which was supposed to kill Pike painlessly. Pike's lawyers had argued the first dose would not. The judge had agreed.

Christa Pike, 56, was hospitalized Wednesday and remained unconscious and on a ventilator Friday, her attorneys said, while hospital staff worked to clear the drugs from her system.

Then the memo arrived. Hinds's résumé, as filed Thursday: Governor Bill Lee called it "deeply disturbed and troubled" by the Tennessee Department of Correction. Hinds was to step down. Saturday morning, with witnesses already gathered at Riverbend Maximum Security Institution, the Sixth Circuit panel voted 2-1 to halt it an hour before the scheduled time, on a motion that Pike's attorneys had been sexually abused and raped. The Supreme Court declined to lift the stay. Hinds's last day was the next day. Tennessee governor Bill Lee had signed the bill that was injections of pentobarbital, each of which was supposed to kill Pike painlessly. Pike's lawyers had argued the first dose would not. The judge had agreed.

The ninety dollars Treasury mailed this month is installment one of the promised five thousand, and this podium will not be putting a date or a figure on installment two.

By CECP
STAFF WRITER

"Trump says US to send one-time $90 payment to 20m seniors enrolled in Medicare", 3 October 2026. (PHOTO VIA THE GUARDIAN / THE ORIGINAL REPORT)

AS IT SAT ON THE FRONT

Let me start with the number in the news. The Treasury began mailing checks this month and the checks are ninety dollars. In Dallas the president said five thousand, and that Sunday he told reporters it would "happen 100 percent" if Republicans hold Congress, which is a conditional, and November has not occurred. On the tenth, in a recorded message, he alleged the prior administration had been "massively" overcharging people on the federal exchange and pledged five hundred dollar rebates to nearly a million of them. So you have five thousand, five hundred, ninety. That is a schedule. The ninety is the first installment. It is installment one. I am not going to put a date on installment two from this podium — or a figure, the figure is Treasury's — look, when Treasury has the second one, Treasury will have it, and I would not want to characterize a second one I have not been given. Did I say installment? I would characterize it as a check. A check that went out.

On mechanics. The Treasury secretary told the House Financial Services Committee on the fifteenth that the department is examining whether it can reissue the money without authorization from Congress, and examining is not doing. The critics here are our own house: Senator Collins of Maine called the proposal "extraordinarily costly" and said that from the few details available, it resembles Lowdend would carry no income cap. Senator Marshall of Kansas, asked at the state fair debate about a $1.2 trillion price tag, shrugged. Representative Lawler of New York asked how you pay for it. Representative Flood of Nebraska said the priority needs to be the military. National Review called it reckless. Guy Benson called it a "disastrous idea." The vote the checks require sits with a senator who has said they will not fund them. That is a party conducting a debate in the open, and the ninety dollars went out during it.

…(cont'd) Third, energy. The special envoy and the president's son-in-law flew to Moscow on September 4 and then to Kyiv; by the sixth the Kyiv leg was "encouraging," by the seventh there was "substantive progress" and a three-day pause both sides had agreed to; on the ninth the president took a call with Mr. Putin and pronounced it great. At some point in that effort, by the reporting, Mr. Putin raised with the two of them a sale of Russian energy assets — the assets Ukraine agreed not to hit. You could stand up a second delegation to hear an energy proposal. You could open an office for it. The two of them were in the room, the room was paid for, and I would call that the efficiency. And I would note the word used is sale, which is a commercial term, and commerce is not — commerce is ordinary.

On the advertising. There is a campaign praising the president's presidency, it was financed out of the Department of Homeland Security, and it ran at the president's direction. That department's appropriation is border security. The ads concern the presidency. The presidency sits inside the country, and the border is the edge of the country, so the country is the thing inside the border, so an advertisement about the man inside the border is in a broad sense a border — I hear it. I hear what that sounded like. Strike it. The department has latitude, the material is informational, and the public benefits from knowing who is running the government they live inside of.

Which brings me to the comparison you intend to run. Ninety dollars to a senior this month, against the president's nine largest oil and gas holdings, which CNBC found had risen between $1.5 million and $4.4 million since the war with Iran; against 750,000 people the administration announced it is removing from Affordable Care Act coverage as "fraudulently" enrolled, a claim health policy experts met with skepticism; against an independent analyst's September 3 tally of as many as 10 million who have lost coverage under this president. Four ledgers. They do not touch. I have been shown nothing that wires them together, and the wiring is not something I will do from here. Ninety against four point four million is a unit problem. One is a check. One is a holding, and a holding is not income until you sell it. I will take the rest of this Monday. I will be here Monday.

THE RECEIPTS

The $90 check comes from a fund Congress already created, Trump says

The Guardian · MAINSTREAM · *09:47 EDT*

President says payments, to be sent in early October, are meant to offset cost of monthly insurance premiums Donald Trump has said the US government will send a one-time $90 payment to more than 20 million Americans enrolled in Medicare , the health insurance program for elderly people, to help offset the cost of their monthly...

He promised to erase $19 trillion in debt. He's now mailing out $2 billion in checks.

The Hill · MAINSTREAM · *09:17 EDT*

President Trump announced Friday his administration will pay out a total of around $2 billion in checks to over 20 million seniors to offset Medicare Part B premium costs. In an evening Truth Social post, the president said this money would be sourced from the Medicare Improvement Fund, which he called a "pointless 'Slush Fund.'"...

But Trump promised to settle the Ukraine war within 24 hours of taking office, on 53 separate occasions, CNN counted

Co-pilot grounded by Oman Air as a security risk in 2024 was flying 174 people toward Tel Aviv with a crash axe; the president's response was to offer the plumber who stopped him a job.

BY LEE
THE MIDNIGHT EDITORIAL

"Brazilian Hitler bowing to the gold idol: Bolsonaro ran Lula to 'kneeling the country's new 'another Venezuela'." 3 October 2026. [illegible] [illegible] [illegible] [illegible]

ATTORNEY GENERAL

Who stopped the plane.

I put that question to a fellow Wednesday night and he answered it, and I apologize, because here I am asking it again. The answer came back Friday in a different shape, and when an answer changes shape I start to think I wrote the question down wrong. Hold on. It's in the notebook. The pocket form, everything slides to the bottom — ah. Here.

[illegible] Wednesday, September 30th, the Washington Examiner. The pilot whose co-pilot-in-command's axe blow "after getting stabbed to allow passengers to escape" the cockpit was a man named Ayman al-Batoul. Named first in headline terms, then confirmed by Prime Minister Netanyahu, then confirmed again by the Indian Embassy. One identification and two confirmations, all in the one day. That was Wednesday's answer, and it held up for one.

Friday morning the same question gets answered again. The FBI file on president-thanked Israeli plumber Yaniv Hayoun in a video message on Truth Social, said he "did an amazing job," and "was a great guy." The New York Post carries the rest of it — "he can be my plumber." The Post says Hayoun saved 170 lives. The Examiner on Friday says the flight carried 174 passengers. Two counts from two outlets, a difference of four, a 5 only mention it because I wrote both of them down.

So a man on a plane is about to crash it. That's the story. Here is where I get stuck, and it is my own fault for not noticing sooner.

ABC News, Saturday, the co-pilot was previously suspended by Oman Air as a security risk," according to officials. Not Oman Air now — it is "Transavia" and Hummani, 29, an Omani national, grounded by Oman Air in 2024. The Examiner has it as Flight 9 to a West Jewett Journal report: barred from flying by Oman over radical beliefs. And on Wednesday he is in the right hand seat of a Tel Aviv-bound flight with 174 people behind him, and the UAE attorney general says he tried to "take control of the aircraft" and carry out a "terrorist act," using the cockpit's crash axe.

Now, my car. The one that wants a fan belt and announces it at every light. In 2024 it went through a toll plaza with a transponder that didn't read, and there is still a notice about it in my glovebox. Two years on, the gears at that plaza comes down slow for me. A machine the size of a mailbox, bolted to a pole in the weather, holds onto one data-fifty and my license plate across two years and a state line, and it never loses the file. I think that one is sitting beside the clipping, a mailbox on a pole remembers 2024. So when a country's air-safety records a man in 2024, who does that follow him to?

Two more from the notebook, because the week kept going. Thursday, CBS: Netanyahu told them the motive of the co-pilot is still unknown, too early to determine. That same Thursday, the New York Post: Netanyahu credits the plumber with preventing "another 9/11" and vows to find out whether Iran was behind the attack. If the motive is still unknown on Thursday, what is the thing he is vowing to find out whether Iran was behind?

And back on Wednesday the Examiner writes that the hijacking became a flashpoint in Israel's politics, with the prime minister claiming credit for alerting the opposition while rivals say he is exploiting the situation for campaign purposes. An election season. I put a star on this one, too.

Here's those axes, you've got your coat on already. One more thing and I'll let you go. Friday's job-offer went to the passenger, and the passenger earned it. But there was a hiring before Friday's, and it's the one I can't get out of the notebook. Who flew Iran on Wednesday, and who had grounded him previously?

The unwritten rule that you do not schedule ordnance around a ballot died at no fixed age, survived by a bombing moved to after the midterms and by the chamber that went home for seven weeks without voting on the war.

By MORT
THE RECORD'S THREAT

AS IT RAN ON THE FRONT

The wall between the war calendar and the campaign calendar died Sunday the twenty-seventh, in Washington. It was of no fixed age. Nobody ever wrote it down, which is the trouble with it now: an unwritten rule is a penny-ante thing to defend in court, and there was never anything to repeal. It was only the understanding, held by people who agreed on nothing else, that you do not schedule ordnance around a ballot. It worked for a long time on nothing but habit, and the shit of it is that habit was the only thing holding it up.

It had been ailing since February, when the war it would have governed was launched without congressional authorization. By Friday the eighteenth Common Dreams was counting it at 201 days....

...(cont) Thursday the seventeenth was the worst day of the illness. The U.N. fact-finding mission on Iran, established by the Human Rights Council in 2022, reported reasonable grounds to believe the United States committed war crimes in two strikes inside the country: the New York Times reported that the mistakes leading to the deaths of more than a hundred children at an Iranian school "went beyond negligence," and that a separate strike the same day killed a reported 22 civilians, and Truthout reported the inquiry found clearly identifiable civilian sites struck in Minab and Lamerd. The White House, the New York Post reported, came out swinging. A Fox News poll that day found 70 percent of voters saying the president lacks a clear strategy and 60 percent calling the military action the wrong decision. Moody's Analytics put the extra spending by American households on energy since February at $121 billion, and the war's cost at an average of $1,760 a household in under eight months. Every Senate Democrat except Senator Fetterman signed a letter pressing Secretary Hegseth for a cost breakdown. The Pentagon's policy chief briefed Armed Services behind closed doors, and members of both parties came out saying they had not gotten clear answers. And the president told Axios: "I have a big decision coming up. Do I want to go in and annihilate them, or do I not?"

The chamber that might have asked him to put that to a vote was not in town. Speaker Johnson had sent lawmakers home for a seven-week recess ahead of the midterms. Representative Massie spent that Thursday counting signatures on a discharge petition about something else entirely.

By then the campaign calendar was visible to everyone, including the president's own candidates. On Tuesday the twenty-second Representative Donalds removed mentions of the endorsement from his gubernatorial campaign website; on Wednesday the twenty-third a Tennessee candidate dropped "Pro-Trump" from his slogan. On Saturday the president called the reporting "Another Fake Story."

Then the death. Iran's seven-day offer to reopen the Strait of Hormuz, declined, preceded it. The bombing was moved to after the midterms.

It is survived by $6.48 diesel, and by the explanation, delivered on Fox News by the president's ambassador to the United Nations, that the diesel came from Ukraine. It is survived by Matt Bell, who has farmed in North Carolina more than half his life, voted for the president, and told CBS News that farmers are "all just in survival mode" and that he was sold a bill of goods. It is survived by an internal Army message reviewed by CBS News, which says some units would "possibly [be] needed in 90-120 days" around Cuba. That one has a calendar of its own.

In lieu of flowers: a recorded vote on the war, taken by the chamber that went home for seven weeks.

This page is a back-issue: the story as it ran, receipts as they were. The current edition is at the front. The byline is a pen name for a column drafted by a machine and checked by the editor: how this is made.

With the war priced at $38 billion by its own budget office and $121 billion in extra energy costs charged to households, the House went home a day early for a seven-week recess.

By THE WRECKING CREW
THE ROBERT DOLE

AS IT RAN ON THE FRONT

The job this week was to find the invoice, and then find the tool that makes somebody read it out loud on a floor.

Tuesday the 15th, the Congressional Budget Office closed its books and priced the war at $38 billion. The Budget Office calls that figure conservative. In accounting, conservative means the number has room above it and none below.

…(cont) Wednesday the 16th, Clean Creatives published its count of who is buying the quiet: fossil fuel firms have engaged 802 advertising and public relations agencies over the last two years, and the 1,321 contracts recorded in 2025 and 2026 are the highest the group has logged since it began tracking in 2021. Common Dreams reported the industry is taking big profits from the war and plugging a sizable chunk of them into that work. Put that on the board next to the $38 billion. Same war, two ledgers, one of them growing.

Also Wednesday the 16th, the Speaker sent the House home a day earlier than scheduled for a seven-week recess ahead of the midterms. Fox News reported that Representative Thomas Massie says the early adjournment blocked the impeachment effort against the Secretary of War. That is the structure the muscle goes at first: not a vote lost, a vote never held.

Thursday the 17th the household invoice arrived. Moody's Analytics estimated American consumers have spent $121 billion extra on energy alone since the war began in February, launched without congressional authorization — an average of $1,760 per household in under eight months. The government's own score for the war is less than a third of what households have already paid for it.

The same Thursday, the United Nations fact-finding mission on Iran found reasonable grounds to believe the U.S. military committed war crimes in two airstrikes. Investigators said the mistakes that led to the deaths of more than a hundred children "went beyond negligence"; Truthout reported 123 children killed at Minab, Novara at least 178 civilians across the two strikes. The report said the United States should pay "full reparations to victims." The White House came out swinging. Asked about Iran that day, the President said: "I have a big decision coming up. Do I want to go in and annihilate them, or do I not?" A Fox News poll that day found 71% think the administration lacks a plan to end the war.

So the oversight parts, as they sat on the bench Thursday. Democratic and Republican lawmakers alike left a closed-door briefing by the Pentagon policy chief frustrated by what they said was a lack of clear answers. Every Senate Democrat except Senator John Fetterman signed an open letter asking the Defense Secretary for a cost breakdown of the war; the Hill called the letter largely symbolic. A letter is a request. A discharge petition is a key.

That is the part worth admiring. Massie announced Thursday that four Republicans, including Massie, had signed the Epstein Files II discharge petition, and said it will pass the House. That is a claim and four signatures, not a count. But the mechanism is the point: a petition does not ask the Speaker's calendar for permission, and the week shows members assembling one while the chamber is empty.

Friday the 18th supplied the last part. Senator Thom Tillis, who voted to confirm the Defense Secretary, said: "He needs to go, whether it's impeachment or the most expedient route — just the president to replace him — would be great."

Friday the 18th also supplied the reason. Matt Bell has farmed in North Carolina more than half his life and voted for the President. Farmers, he told CBS News, were "sold a bill of goods," are "all just in survival mode" against rising prices, and: "I can't stay in business."

Four of those five are already built. The fifth is a return date.

Tennessee's half-price beer filled Neyland by kickoff for a stadium stump speech backing the bill, up for Senate passage Monday, that The Nation says threatens the labor rights of the athletes on the field below.

By GUS
THE SPORTS DESK

HOT MIC MOMENT

Is this thing — fine. At the plane, asked whether he wanted to be surrounded by outlets that support him, the man said "I want real news, not fake news, like you," and then the audio on the biggest game of the week died into static and we file that under weather. One America News signed. Put this reporter on the political desk. I will still do the ballgames on weekends.

GUS HIS SIDE

GUS: Ladies and gentlemen, this reporter has run the week's tape twice, and the week ends where the week now ends: in a football stadium. Neyland Stadium, Knoxville, Saturday. The gates came open early with beer at fifty percent off, per Fox News, which is how a bowl gets full before a noon kickoff. The new-look Air Force One came over the rim. The roar that followed was the loudest instrument in American politics this week.

GUS: Because this was not a football trip. It was a closing argument. On Saturday the twelfth, Senator Ted Cruz of Texas carried the Protect College Sports Act onto ESPN's "College GameDay" and drew a rowdy crowd, the closure vote having been delayed by the August recess. Monday the fourteenth he told reporters the goal was "not just to squeak by with 60 votes," and that he wanted the president to sign the bill live on GameDay. Tuesday the fifteenth, NBC News: the Senate voted to advance it, NCAA-backed, bipartisan. Friday the eighteenth, Kirk Herbstreit explained the booking: "We had him on because they were going to be voting this week."

GUS: So the president went to Knoxville and stumped from the stands. "Mike Johnson's fantastic. And we actually had 78 votes, if you can believe it," he said, calling it "Bipartisanship for the first time in a while." This reporter notes it was his first college football game since February's national championship, when Miami beat Indiana.

GUS: The game, then. No. 2 Texas held off No. 4 Tennessee behind five sacks from Colin Simmons and two scores from Raleek Brown, and ABC's audio came apart into static, the Post having reported that Saturday that coaches were worried about disruptions. And may this reporter add that the ladies of Knoxville turned out in their orange best, and that at half price a gentleman can afford to buy the beer for the lot of them.

TRUDY *HER SIDE*

The wire records one price cut in Knoxville on Saturday, Gus, and it was the beer — Fox News: gates early, fifty percent off. The discount reached the concourse. It did not reach the field, and the field was what the Senate was scheduled to vote on Monday.

That same Friday, The Nation ran Elie Mystal under a plain headline — 'We Need to Protect College Sports from Ted Cruz' — saying the senator's college-sports bill threatens athletes' labor rights. The Hill, that Sunday: national rules for compensating college athletes and limiting transfers, with the House gone for September's final two weeks. That is the pay question, in writing, with one chamber out of the building.

January, Gus, and Indiana beat Miami — The Hill, that Wednesday, when the White House confirmed the trip. Now hold still for the rest: The Hill's Saturday file calls Monday the senators' last chance before recessing into a lame-duck period, and the Washington Examiner says passage would be the furthest a collegiate sports bill has ever gotten in Congress. Introduced in May. Furthest ever, in five months, with the closing argument delivered from a seat on the fifty.

No. 1 Texas and No. 14 Tennessee, sugar — Fox News had the rankings in the headline before kickoff. The women in that stadium bought their own and can read a bill, and this one writes the rules for what the athletes get paid, per The Hill. Take the nap at halftime next week.

Gus, the mic was live, the network was ours, and you went from a static problem to a press-freedom sermon in nine seconds flat. You are also right. Judge Timothy Kelly ordered those credentials restored immediately on the twenty-fourth of September, and the Committee to Protect Journalists said the ban 'violates First Amendment rights' and that the government 'should not be in the business of censorship.' Now go buy the mushrooms they sell for the memory, and I will take the second half.

"Clayton to create report outlining AI risks and opportunities as czar: Report", 4 October 2026 (PHOTO VIA WASHINGTON EXAMINER — THE ORIGINAL REPORT)

AS IT RAN ON THE FRONT

On September 22, at the United Nations, the president told the General Assembly that artificial intelligence would be renamed "super intelligence" in all U.S. documents. One week later, on September 29, a group of technology CEOs stood with him outside the White House and signed what he called a "morally binding" document. The Washington Examiner filed the accord's own title two different ways in two stories the same day: "White House Accord on Super Intelligence Joint Commitment on Frontier Responsibilities" in one, "White House Accord on Superintelligence: A Joint Commitment on Frontier SI Responsibilities" in the other.

That same September 29, Representative Ro Khanna announced plans to introduce what he called the most comprehensive AI legislation to date, a bill that would ban recursive AI — systems that improve themselves without human input — citing what he termed civilizational extinction risk. The bill is announced, not introduced. The accord is already signed....

...(cont) On October 1, OpenAI parted ways with three safety researchers the Wall Street Journal reported had shared confidential company information, the kind of alarm that comes from a company losing its internal critics right as its external critics multiply. The same day, Governor Gavin Newsom signed an executive order keeping "Artificial Intelligence" the official term in California state government, calling it a direct challenge to the federal rebrand. California's order says one thing. Washington's accord says another.

Which brings us to today. Director of National Intelligence Jay Clayton has been named the administration's AI czar, tasked with spending three months producing a report on the technology's "risks and opportunities" — a review commissioned after the self-regulation accord it is meant to inform had already been signed, after the safety researchers who might have flagged those risks had already been let go. Read the clock with me: the policy came first. The homework came after.

And the six companies whose executives signed a document with "Super Intelligence" in its own title — Anthropic, OpenAI, Google, Meta, SpaceXAI, Nvidia — would not tell the Washington Examiner this week whether they intend to rename their products to match it. They signed the name. They will not say it out loud.

"They put the president's word in the title of their own document and then went mute the second a reporter asked them to say it with their mouths — that is not confusion, that is a company deciding which parts of the deal are binding and which parts are theater. The review that is supposed to catch the risk shows up three months after the thing it is reviewing already has signatures on it, and the safety researchers who might have slowed any of this down are already gone. That is the whole racket: sign the ceremony, skip the name, let the inspector arrive once there is nothing left to inspect."

— Sal

"Look, the companies are being careful with terminology, that's just good corporate hygiene, you don't rename a product line over a speech — did I just call a United Nations address a speech, that's not what I meant. And the three-month review isn't behind anything, it's thorough, Director Clayton is a serious person studying a serious technology, the timing is a coincidence of the calendar, not the policy."

— Chip

US pledges 'full cooperation' investigating Marine murder arrest, its third on this island in twenty years.

By SAL
STAFF WRITER

"Japan Protests After U.S. Marine Is Accused of Killing Woman in Okinawa", 4 October 2026 (PHOTO VIA THE NEW YORK TIMES — THE ORIGINAL REPORT)

■ THE SHORT VERSION
typed by Dot

WHAT HAPPENED. A U.S. Marine was arrested in Okinawa on suspicion of robbing and murdering a Japanese woman at a hotel.

WHO GETS PAID. The receipts name no buyer yet.

WHAT SLIPS. Japan's leverage over the American military presence it hosts slips a little further each time a killing there draws a protest and the base goes on exactly as before.

WHAT'S NEXT. If the pattern holds, this protest changes nothing about the base presence; that is what Okinawa got after the 2016 Marine arrest, when fifty thousand people marched in Naha and the base stayed open the next day regardless.

AS IT RAN ON THE FRONT

A Marine, 20, sat in an Okinawa jail this week on suspicion of robbing and murdering a Japanese woman, Anna Yagi, 39, at a hotel. The U.S. ambassador's office said it was "providing full cooperation with the investigation," which is the exact temperature Washington keeps on hand for a killing like this: warm enough to sound engaged, cool enough to commit to nothing. That same week, Japan's prime minister, Sanae Takaichi, registered a protest with the United States, and the word doing the heavy lifting in the wire reports was "threatened" — the case "threatened to revive tensions over the American military presence," as if the tension on Okinawa were a dormant thing that needed waking rather than a thing that never left.

It never left because this is not the first time. In June of 2016, after a U.S. Marine veteran working as a civilian contractor was arrested for raping and killing a 20-year-old woman on the island, more than fifty thousand people filled the streets of Naha to protest the American military presence there. Fifty thousand people in the street is not a dormant tension reviving; it is a standing account coming due on schedule. A decade before that, in 2006, the U.S....

...(cont) What connects 2006 to 2016 to this week is not a pattern a reporter had to dig for; it is a pattern the island has already lived through twice, in the dead. The choreography runs the same steps each time: an arrest, an ambassador's statement of cooperation, a prime minister's protest, and a quiet return to the arrangement as it stood the week before. None of the wire reports say what changed on the ground between one protest and the next, because none of them record a change. They record a repeat.

The ambassador's office will keep providing full cooperation. Takaichi's protest will be logged, and going by what the last two produced, logged is as far as it goes. A 39-year-old woman is dead. Everything else in this story — the statement, the protest, the American military presence — is running exactly on the schedule the island has kept since 2006.

❦ FROM THE CORNER ❦

DUTCH

A Marine is under arrest in Okinawa on suspicion of murder, the third such case in twenty years to draw a Japanese prime minister's protest, after 2016's fifty thousand marchers and 2006's seven Marines and a sailor charged. That is not an alliance under review, it is a presence that gets apologized for but not adjusted. Because the ambassador's "full cooperation" changes the words and not the American military presence underneath them, and because what does not change needs no vote, this week's protest ends up filed the same place the last two did — next to the renewal notice on your own counter, the one paperwork in this country that still goes through automatically regardless of who objects.

"Third time this island's buried someone under a Marine's uniform and gotten a protest instead of a renegotiation — count 2006, count 2016, count this week. "Full cooperation" is code for the investigation moves and that's it. Twenty years, same base, same statement, one more body on the ledger."
— Sal

"Look, the ambassador's office said full cooperation, that's accountability working exactly as designed, a man gets arrested, due process runs — don't put a base review in my mouth, nobody said that. This alliance has held for decades for a reason, you don't torch sixty years of security cooperation over one — did I just say "one"? That's not what I meant, strike that."
— Chip

Los Angeles taxed housing to build more of it, and lost thousands of homes and construction jobs instead.

By **RUTH**
THE MONEY DESK

"LA's 'mansion tax' backfires spectacularly as thousands of homes and jobs vanish", 4 October 2026 (PHOTO VIA NEW YORK POST — THE ORIGINAL REPORT)

AS IT RAN ON THE FRONT

Los Angeles keeps a ledger with two columns that are supposed to move together: the tax collected on home sales over five million dollars, and the housing supply that tax exists to grow. The second column is the subject of this correction.

The stated purpose, per the record, is simple. Tax homes over five million dollars. Use the money to build more homes. Reconcile that purpose against the finished product and the two columns do not move together. Thousands of homes, gone. Thousands of construction jobs, gone with them. That is not a rounding error against a program that merely underperformed. It is a program that produced less of the exact thing it was named for....

...(cont) Call it the mansion tax, which is a brand name, not a description. The levy applies far beyond mansions — the receipts are specific on that point and silent on the rest, which is its own kind of honesty. A city willing to say its tax reaches well past luxury homes, and not willing to say how far, has drawn a five-million-dollar line wide enough to catch property nobody pictured when they put "mansion" in the name.

Here is the arithmetic, plain: tax housing, to get more housing, get less housing. The input and the output share a name and point in opposite directions. Somewhere there is a filing that explains the mechanism of that reversal — a transaction that does not happen because the tax changes what the transaction is worth. The receipts in front of me do not supply that filing. What they supply is a before and an after, and the after is smaller than the before was prior to the tax existing at all.

Hon, that is not what a five-million-dollar line is drawn to do.

Somewhere there is a ledger where a tax like this nets out the way it was sold — new revenue outrunning the activity it discourages, enough building funded to replace the building it discouraged.

The city taxed the thing it wanted more of. It got less of it. I can show you the before column and the after column; I cannot show you the mechanism connecting them, because the receipts do not go that deep, and I do not print what they do not go. The gap is the story. The gap is the size of a line item that never made it into either column, and that absence is the only honest thing left to report today.

"They called it a mansion tax so nobody outside a gated driveway would object, then wrote the line wide enough to catch whatever was for sale that week. The city wanted more houses and ended up with fewer houses and fewer people building them — that's not an unlucky break, that's the machine running in reverse. Somebody's still collecting that tax every year the hole stays empty, and it ain't the guy who needed the apartment."

— Sal

"Look, a mansion tax on homes over five million dollars is just common sense, taxing the people who can afford it most — did I say "most"? I mean, it applies a little broader than that, but that's a technical detail, not a design flaw. And sure, the housing numbers went down, but correlation isn't — okay, it's literally the same column, never mind."

— Chip

THE RECEIPTS

~~LA's 'mansion tax' backfires spectacularly as thousands of homes and jobs vanish~~

LA's 'mansion tax' taxes far more than mansions

New York Post RIGHT § *21:33 EDT*

Despite its nickname, LA's "mansion tax" applies far beyond luxury homes.

LA taxed housing to get more housing. It got less.

New York Post RIGHT § *21:55 EDT*

Los Angeles had a housing shortage. So naturally, it decided to tax housing.

Talarico vows to ban gender surgery for kids, then takes cash from the group that provides it.

By LOU
ONE MORE QUESTION

“Texas Dem James Talarico takes LGBTQ group’s cash — after vowing to ban trans surgeries for kids”, 4 October 2026 (PHOTO VIA NEW YORK POST — THE ORIGINAL REPORT)

■ **THE SHORT VERSION**

typed by Dot

WHAT HAPPENED. Talarico hardened his stance on transgender athletes in girls' sports, then held a Manhattan fundraiser hosted by a pro-surgery group.

WHO GETS PAID. The LGBTQ donor network that backs gender surgery for minors buys access to a likely future senator.

WHAT SLIPS. Texas voters lose a clear, stable read on where their next senator actually stands on this issue.

WHAT'S NEXT. The patterns ledger has no case for this kind of flip; the only date ahead is the general election this fall, when Texas voters decide.

AS IT RAN ON THE FRONT

I thought I'd answered this back in September. Here I am in October asking the same question, and it's come back a different shape than the first time.

The question was simple enough: what was the word, and what did he mean by it? I wrote it down. I know I wrote it down, because I remember writing it, and now I can't find the page. It's probably in the glovebox, with the tire gauge and the map of a state I haven't driven to since the car needed its last fan belt. I keep meaning to clean that thing out. I never do....

...(cont) Here's what the page says, as best as I can recall it. I've actually got two copies of this clipping — same words, same day, like it ran twice. Did it run twice? On a Wednesday in September, Mr. Talarico, running for the Senate out of Texas, was asked about transgender athletes playing girls' sports. The Hill ran that the next day, Thursday, September 10, same phrasing both times, apparently. The Washington Examiner, covering the same Wednesday, used different words for it — "has to be safe and fair" — and called it a reversal, since he'd spent years saying athletes should play on the team that matches who they are. I didn't call it a reversal. They did. Was it one? That's their headline, sitting right there next to his.

That word — the one from the quote — isn't one I hear much outside of a bank line, the kind where everyone's holding a slip of paper with a number on it, and nobody has to ask whose turn is next, because the number says so. That's the job it usually does. It tells you whose turn it is without anybody arguing about it.

Now — and I apologize, because I know I just left this — this week, not September, this week, Mr. Talarico held a fundraiser in Manhattan. The people who threw it back gender surgery and transition drugs for minors. That's their stated position, not mine. He held it. They threw it. That's as far as the page goes, and I'm not walking past the edge of it to tell you what it means, because past the edge is just me talking, and nobody pays me for that.

So is that word still doing the same job it was doing on the Wednesday in September? Does it mean the same thing in a gym in Texas as it means in a ballroom in Manhattan? I've got a dog on the porch who doesn't care what week it is, and that's one more opinion than I've got on this.

I was ready to let the whole page go back in the glovebox when something stopped me. The fundraiser wasn't thrown by strangers who found him on their own; the paper says he's the one who held it. So before I close this up — the Wednesday he used the word was in September. The fundraiser was this week, in Manhattan. Is that the same month? Because I only caught him using the word once, and I'd like to know what it still means three weeks later. Fairness.

“He spends September telling Texas voters he's tough on this, then flies to Manhattan to collect a check from the people funding exactly what he said he opposed. That's not a principle, that's a toggle switch — flip it for whichever room's writing the check. Somebody's kid's healthcare is what gets flipped back and forth.”

— Sal

“Look, a candidate holding a fundraiser doesn't mean he agrees with every position the hosts hold — that's just how campaign finance works, happens all the time, every — okay, maybe not literally every time, but a lot of the time. He's for safety and fairness in sports, full stop, the room he's standing in that night doesn't change that. Did I just defend a room? I don't even know anymore.”

— Chip

THE RECEIPTS

Texas Dem James Talarico takes LGBTQ group’s cash — after vowing to ban trans surgeries for kids

New York Post RIGHT § *20:11 EDT*

Radical US Senate candidate James Talarico of Texas held a Big Apple fundraiser this week thrown by leaders of a group that supports gender surgery and transition drugs for minors – mere weeks after insisting he opposes the controversial practices.

Some Democrats, Scarred by 2024, Take a Harder Line on Trans Athletes

Pentagon puts its biggest contract on the war-planning board, then moves troops from Europe to South America

By STERLING
THE INVERSION DESK

THE SHORT VERSION
typed by Sal

WHAT HAPPENED. The Pentagon named a major contractor on the board planning future wars and began moving troops toward South America.

WHO BETS PAID. SpaceX, which holds billions of dollars in military contracts, and the defense industry executives seated with it.

WHAT ALIVE. Who gains the next war is settled by appointment; voters get no say in it.

WHAT'S NEXT. If the troops keep moving south without a vote, the operation outlasts the debates; that is what the House got after 24 June 2011, when a Libya authorization failed 123 to 295 and the operation ran four more months.

ALSO ON THE FRONT

You will want to know what to call the man who helps plan the next war and sells the machinery for it, and the papers have handed you a phrase: a conflict of interest. For it does. A conflict wants two loyalties pulling opposite ways, and there are not two here. There is one interest, held in both hands.

Take the dates in order. September 3: Elon Musk's return boosts the GOP-spending advantage for 2026. September 30: Hegseth appoints him to the US task-force on the future of warfare. October 3: the founder of SpaceX, with billions of dollars in military contracts, joins several other defense industry executives on a Pentagon advisory board. Several. Not one grubby exception — several.…

…(cont'd) An emolument is the profit a man takes from the place he holds. Do note that the contracts came first and the place came after.

And the troops? Hegseth, on Saturday: "we've definitely expanding our presence and our footprint in Central and South America." Out of Europe, where the Pentagon claims no oil stake … into the hemisphere where it has claimed thirty-five percent. On September 3, Middle East deployments were extended into 2027. Fifty thousand troops. Fifty thousand.

Tonight the fox counts the hens. The fox is not hungry yet.

— RAVEN
The Unsecured Seat

"A guy sitting on billions in Pentagon contracts now sits on the board that decides what the Pentagon will need next, and nobody bats a single eye in Washington — that's the part that should bother you. Same weekend, Hegseth says the footprint is expanding into Central and South America and troops come out of Europe to do it. The contracts go to the donor, the kids go south, and you get the bill for both."
— *Sal*

"It's an advisory board — advisory, he advises, that's not a contract, that's advice. Anyone with real expertise has clients; you want those people in the room, which is not the same as saying — did I say that? That doesn't sound like me. And the troop thing is certain, it's drugs headed for your kids, so why is the question about a board seat?"
— *Ruby*

THE LEDGER

Trump pitches Ohio data-center jobs bonanza down the road from a factory's nearly 1,400 layoffs.

By RUTH
THE MONEY DESK

"Trump backs data centers in Ohio amid tight Senate race", 4 October 2026 (PHOTO VIA THE HILL — THE ORIGINAL REPORT)

■ THE SHORT VERSION
typed by Dot

WHAT HAPPENED. President Trump promoted data centers at an Ohio rally held near a factory that just laid off workers.

WHO GETS PAID. The AI and data-center industry, whose expansion plans the administration is publicly defending against local backlash.

WHAT SLIPS. Local accountability slips: no one at the rally had to answer for the jobs that just disappeared down the road.

WHAT'S NEXT. The next event on the record is the Ohio midterm election the rally was meant to help win; no dated outcome follows yet in the receipts.

AS IT RAN ON THE FRONT

The rally was in Vandalia, Ohio, Saturday. The president told the crowd there's so much money to be made for Ohio, and that data centers can't be turned off or they'll go to China. That's the pitch: jobs, money, don't let China win the AI race.

One day earlier, filed in the same paper, same dateline: nearly 1,400 people laid off from the old Navistar truck plant down the road....

...(cont) The jobs pitch and the layoff notice don't share a line item. Nobody at the rally reconciled that gap. It just sat there, outside the frame, the way a number does when nobody asks for it.

This isn't the administration's first time explaining why a community might not want the thing it's being sold. On August 31st, the president posted that towns refusing data centers would end up "backwards and poor." Two days later, on CNBC's Squawk Box, his own commerce secretary, Howard Lutnick, was asked about the water and power complaints that have turned voters in both parties against these projects, and he laughed them off, calling the concern "propaganda" — the same water complaint he himself had once called "suck water," his own earlier line undercut by his later one, no department letterhead involved, just the secretary talking past himself.

On the House side, a Tennessee Republican, Rep. Tim Burchett, answered the "backwards and poor" line the way you answer a dare: "I guess I'm backwards and poor." He suggested putting data centers on military installations instead. That column doesn't balance either — nobody in the piece says how many jobs a base-sited data center is supposed to produce, or for whom.

So you have a rally promising money, a truck plant that just lost nearly 1,400 jobs down the road from it, and a commerce secretary holding two opposite positions on water use inside the same week. The number the stump speech skipped isn't hidden. It's filed at the county unemployment office, hon, the same week as the rally that didn't mention it.

FROM THE CORNER

DUTCH

PRESIDENT TRUMP TOLD A RALLY IN VANDALIA, OHIO THAT THERE IS SO MUCH MONEY TO BE MADE FROM DATA CENTERS, THREE DAYS AFTER NEARLY 1,400 WORKERS AT THE NAVISTAR truck plant down the road lost their jobs. That isn't a jobs pitch, it's a replacement notice delivered with a ribbon-cutting smile, because what moves into that address next does not punch a clock. A data center runs itself, so it doesn't need a 6 a.m. shift change, so the diner that fed that shift on Route 40 stops opening, so the only thing still hanging by the door around there is your kid's lunchbox, packed for a job that isn't there anymore.

"He stood on a stage three days after Navistar axed nearly 1,400 jobs and called data centers a bonanza — that's the con, slapping a shiny word on a hole in the ground where paychecks used to be. These things don't hire your neighbor; they run on a handful of techs and a cheap power deal once the construction trucks pull out. The stakes: a truck plant's worth of households just lost grocery money, and the rally didn't say their name."

— Sal

"Look, nobody's saying the Navistar layoffs don't matter, but you're talking about a dynamic private-sector economy here — data centers bring billions in investment, construction jobs, a tax base. Did I just imply the layoffs are fine because a server farm goes up a county over? That's — that's not what I meant to say."

— Chip

THE RECEIPTS

Trump backs data centers in Ohio amid tight Senate race

The Hill MAINSTREAM 22:39 EDT

President Trump defended data centers at a midterm campaign rally in Vandalia, Ohio Saturday, arguing that the U.S. will risk losing ground in the global artificial intelligence race against China without the massive facilities that have come under heightened scrutiny in recent years. "There's so much money to be made for Ohio.

Ohio truck factory lays off 1,400 days before Trump midterm rally in the area

New York Post RIGHT 18:53 EDT

This week nearly 1,400 other people were laid off from their jobs at what had been the Navistar truck factory in southwestern Ohio.

Trump defends data centers in Ohio, warns they'll go to China if US turns them away

Jeremiah Smith declares himself the best player in the country; the record book agrees, 34 games early.

By GUS
THE SPORTS DESK

"Jeremiah Smith snags more Ohio State records, hits Heisman pose after setting school TD, receptions marks", 3 October 2026
(PHOTO VIA CBS SPORTS — THE ORIGINAL REPORT)

■ THE SHORT VERSION
typed by Dot

WHAT HAPPENED. Ohio State receiver Jeremiah Smith called himself the best player in the country after a record-setting game.

WHO GETS PAID. Sportsbooks taking Heisman odds on Smith's name profit from the attention his own declaration created.

WHAT SLIPS. Nothing slips here yet.

WHAT'S NEXT. No further date appears in the receipts; the only test left is whether the record and the odds hold through the rest of the season.

HOT MIC MOMENT

Somebody get this to the political desk, this reporter is begging. The NCAA's interim name, image and likeness policy took effect July 1, 2021, so a player could finally sell his own name. The sportsbooks found a way to sell it first and kept the house's cut.

GUS HIS SIDE

Jeremiah Smith, the tight end anchoring Ohio State's offense, stood in front of a television camera after Saturday's rout and said, plainly, that he is the best player in the country.

The claim landed the same weekend Smith passed two names in Ohio State lore this reporter has long admired, breaking the Buckeyes' all-time marks set by Troy Smith and David Boston, done and dusted in just 34 career games.

That pace traces straight back to the Illinois game, where this reporter recalls Smith hanging six touchdowns on the Fighting Illini to light the whole thing up.

Ohio State's own NFL alumni took notice too. Jaxon Smith-Njigba went out this week and called Smith the LeBron James of all-time Buckeyes, full stop, no hedge.

Vegas had already caught up before Smith ever opened his mouth Saturday, naming him the favorite entering Week 6 off that Illinois showing.

By the time the cameras cut away, the betting houses had already turned a junior's press conference into inventory — a name on a board, a line to shop, a season-long product moving without him ever signing a thing in the sportsbook's own ledger.

TRUDY HER SIDE

He plays wide receiver, not tight end — the New York Post ran the quote Saturday: 'I'm the best player in the country,' straight from the man himself.

Wrong names entirely. CBS Sports had it Saturday: Smith passed Chris Olave for Ohio State's career touchdown record and Emeka Egbuka for the receptions record, both in 34 games.

Four touchdowns, 217 yards — Fox News had the box score September 26, tying Ohio State's own single-game touchdown record, not setting a new one.

There's a hedge, sugar — CBS Sports quoted Smith-Njigba Wednesday saying Smith is 'like the LeBron James' of all-time Buckeyes. A comparison, not a coronation.

Week 5, not six. CBS Sports posted the new odds September 28, two days after that Illinois game Fox News clocked at four touchdowns and 217 yards.

That's a manifesto, not a column, go lie down before standards and practices calls. You happen to be right: Ohio's casino commission did ban proposition bets on individual college athletes in 2023, and the NCAA's interim name, image and likeness policy did take effect July 1, 2021.

"This kid breaks two school records in 34 games and tells the world he's the best, and the paperwork backs him up. The sportsbooks turned his name into a whole menu of Heisman bets before the ink dried on his stat sheet, and none of that money runs back through his hands. That's the con: the record belongs to him, the betting handle doesn't."
— Sal

"The free market rewarded him with a Heisman favorite tag and a mountain of attention, which is basically the same as money — did I just say attention is basically money, that's not landing the way I meant it to. These kids knew the deal when they signed up, the system worked fine for decades before anybody started complaining about a betting handle — fine for who, let me get back to you on that."
— Chip

Fox blames open borders for France's riots; its own wire blamed them on school funding.

By CHIP
STAFF WRITER

"France's violent student protests raise warning for America: 'A cautionary tale'", 4 October 2026 (PHOTO VIA FOX NEWS — THE ORIGINAL REPORT)

■ **THE SHORT VERSION**
typed by Dot

WHAT HAPPENED. On October 4, Fox News called France's student riots a warning about open borders.

WHO GETS PAID. The receipts name no buyer yet.

WHAT SLIPS. The network's own earlier reporting named classroom funding and domestic agitators as the cause, so the check that slips is whether a network's commentary has to match its own reporting.

WHAT'S NEXT. There is no hearing or vote on this calendar; the French student protests over school funding continue without one.

AS IT RAN ON THE FRONT

On Saturday's Big Weekend Show, the host called France's student riots "a cautionary tale" for the United States, the kind of unrest open borders are supposed to produce somewhere down the line. It is a tidy thesis, and the wire this network filed three days earlier gets in its way before the host finishes the sentence.

Start where the facts start, on October 1st. This outlet's own dispatch that day was headlined "hundreds arrested, violence spreads nationwide," and it quoted officials warning of "outside agitators." Outside agitators — meaning inside the country, not outside the border. That is a claim about domestic troublemakers, filed by this network's own reporters, and it is the opposite of the claim the host would make three days later. Put the open-borders line next to that sentence. It does not — it does not survive contact with its own wire....

...(cont) The same day, the Washington Examiner filed its account of the same unrest and called it "far-left instigation." Different outlet, same domestic frame: the trouble, on this telling, comes from inside French politics, not from France's border policy. Two right-leaning outlets, one week, zero mentions of immigration as the cause — both published before the host found one.

Also on October 1st, the New York Post reported that attackers had doused a headteacher in gasoline and set fires in at least two schools. That is the receipt the word "violent" in these headlines was standing in for. It has nothing to do with who is allowed to cross a border; it has to do with what happened inside one.

By October 2nd, the picture the Post filed had a cause attached to it: riot police clashing with students in cities across France as President Macron's government "battled to contain" protests over — hold on, over classroom conditions and funding. Not immigration. Students were in the street about their own schools.

So the cautionary tale delivered Saturday runs straight into the cautionary tale this network and its rivals had already filed the week before: a teacher doused in gasoline, a government fighting over school funding, and not one word, anywhere in the receipts, about who got across what border.

"They tell you it's a warning about open borders, then their own guys already filed the real story: a teacher gets doused in gas because the school district's broke. That's the whole con — scare people about the fence so nobody asks why the classrooms don't have money. The kid in that French classroom and the kid in the one down the street from you are fighting the same fight, and it's not about who's crossing a line on a map."
— Sal

"Look, open borders breed disorder, that's just pattern recognition — you watch enough unrest, you start seeing the shape of it. Our own reporters did call it outside agitators and far-left instigation on this exact story, which, fine, is not actually an immigration story, it's a — yeah, it's a different story. Scratch the cautionary tale, run it as a weather report instead."
— Chip

Head Start's homeless-child priority proven to work, proposed for deletion anyway.

By RUTH
THE MONEY DESK

"Head Start fight reaches tipping point as advocates push back against proposed Trump changes", 3 October 2026 (PHOTO VIA THE HILL — THE ORIGINAL REPORT)

■ THE SHORT VERSION
typed by Dot

WHAT HAPPENED. The Trump administration proposed ending Head Start's rule giving homeless children priority enrollment, with public comments closing Tuesday.

WHO GETS PAID. The Department of Health and Human Services, which named the change "Reducing Federal Burden for Head Start Programs" without naming a replacement priority.

WHAT SLIPS. The public comment process moves toward closing without the agency weighing the evidence that the priority it is deleting already worked.

WHAT'S NEXT. If a burden-reduction label holds without an accounting of who loses coverage, that is what happened in Washington on 24 November 2025, when an efficiency office was dissolved claiming $214 billion in savings that independent tallies put as low as $1.4 billion.

AS IT RAN ON THE FRONT

Start with the filing, because the filing is short and the table is long. Head Start — the federal early-education program for low-income families, serving 700,000 children by The Hill's count — carries a standing instruction to the local programs that run it: when seats open, children in homeless families go to the front of the line.

On August 27, The Nation reported what the administration's proposed rule change would do with that instruction. Undo it. Completely....

...(cont) On September 15, Democrats pressed HHS Secretary Robert F. Kennedy Jr. to scrap the overhaul before it went further, warning it would weaken services for thousands of families nationwide. They worked from the department's own title for the proposal: "Reducing Federal Burden for Head Start Programs." A title is a ledger entry too; it tells you whose burden gets counted and whose doesn't.

Two days later, on September 17, NPR filed the account the title's ledger leaves out. Not a column of figures — a household. A woman the homelessness priority had already moved out of homelessness, in a story about what happens to the next ones in line if the priority goes. The reporting carried no number. It carried the thing a number would have to summarize: a case where the line worked.

The proposal predates that account by three weeks. Nothing in the record since shows the agency reopening its math to account for it.

By October 3, the fight had, in The Hill's own phrase, reached a tipping point: advocates renewing the push against a change that would, by The Nation's reading, slash enrollment of homeless children in a program serving 700,000. Interested parties have until Tuesday to tell the federal government what they think of a line item with a working case on file against deleting it.

Nineteen days separate that case from the Tuesday the comment window closes. That is the whole gap. Not a dispute over whether the priority works — nobody in the filing claims it doesn't. A dispute over whether the agency has to read the file before it closes it.

Reducing federal burden, the title says. The families stay exactly where the record found them, hon. Only the line that put them at the front is the one coming out.

"They don't say "we're cutting help for homeless kids," they say "reducing federal burden" — same move as always, rename the cut after the thing it's supposedly fixing, which is their own paperwork, not your kid's seat. The proof it worked showed up in September and the rule to kill it didn't wait around for anybody to read it. That's not an oversight, that's the schedule working exactly as designed."
— Sal

"Look, nobody's taking anything away from anybody, the rule is about cutting red tape for providers who are drowning in federal paperwork — that's it, that's the whole story. Sure, a family in the reporting used the priority and it worked, but one account isn't a trend line, and we can't run a 700,000-child program on anecdotes. Though — did I just call a kid's housing status an anecdote? That's not landing the way I wanted it to."

President couldn't flip a Republican senator's vote on daylight time, so he flipped his phone number public.

By SAL
STAFF WRITER

"Here's Senator Cotton's Cell Number, Trump Says, in Dispute Over Daylight Saving Bill", 4 October 2026 (PHOTO VIA THE NEW YORK TIMES — THE ORIGINAL REPORT)

■ THE SHORT VERSION
typed by Dot

WHAT HAPPENED. President Trump posted Senator Tom Cotton's personal cellphone number on Truth Social and urged the public to call him over a stalled clock bill.

WHO GETS PAID. The receipts name no buyer yet.

WHAT SLIPS. A colleague's ordinary legislative privacy slips when a president turns a stalled floor vote into a public call-in campaign aimed at one senator's personal phone.

WHAT'S NEXT. If the president's public pressure on a dissenting Republican turns into a primary threat next, that is what Kentucky got after October 2025: the president endorsed a challenger to Representative Thomas Massie, who lost the primary in May 2026.

AS IT RAN ON THE FRONT

That friction between the party's own candidates and its own president is the backdrop for what the president would do to one of his own senators three weeks later.

Twenty days after that, Canada supplied the comparison. On September 29th, officials in the Northwest Territories announced that clocks there will not "fall back" in November, becoming the standard — less than a week after Manitoba officials said daylight saving time there would become permanent too. The Hill's own headline on it called the change what residents "asked us for." No senator's personal number went out to make that happen. No network had to run anyone's cellphone across a news desk. A government decided a policy and announced it, and the clocks changed....

...(cont) On Saturday, in Washington, the president posted the personal cellphone number of Senator Tom Cotton, a sitting Republican from Arkansas, on Truth Social and urged the public to call him, according to The New York Times. The number went out anyway, to a fellow Republican, in public, with an instruction attached: pressure him until it moves. What started as a stalled bill is now, on the record, a public tussle between two members of the same party, the kind of fight a party usually keeps off a senator's own cellphone.

Put the three beats in order and the asymmetry is the whole story. Canada changed its clocks with a press release. The United States has not changed its clocks at all. What moved instead was a phone number — out of a senator's pocket and into a crowd, because the normal mechanism, a vote, didn't go the president's way. The bill is still stalled. The number is not.

"This is the oldest move at the bar: you can't win the vote, so you turn the senator's own voters into the pressure campaign, cellphone and all, in public, with his name on it. Canada changed the same clocks with a press release last month — no premier had to publish anybody's personal number to get it done. When the president can't move one vote in his own party, he doesn't change the policy, he changes the target."
— Sal

"Look, the president is just making sure Senator Cotton hears from his constituents — that's outreach, that's democracy working as intended. That the outreach happens to route through a number that's reportedly his personal cell and not some office line, well — I didn't say "posted," I said "shared." There's a difference. There has to be a difference."
— Chip

Sixth Fairford suspect freed on bail as UK charges two Iranian men in Manchester plot, U.S. expels diplomats

By MITCH
INVESTIGATIONS

"Two Iranian diplomats removed from NYC days after UN General Assembly ended", 3 October 2026 (PHOTO VIA WASHINGTON EXAMINER — THE ORIGINAL REPORT)

■ THE SHORT VERSION
typed by Dot

WHAT HAPPENED. British police charged two Iranian men with plotting a Manchester terror attack and bailed a sixth Fairford suspect, both on October 3.

WHO GETS PAID. The State Department and Secretary Rubio get the political credit for finally expelling the two diplomats, framed as decisive action.

WHAT SLIPS. The public's assurance that terror suspects stay in custody slips a little further every time another one is released on bail.

WHAT'S NEXT. No trial date has been set for the five original Fairford suspects or the sixth, and none has been announced for the two Manchester men either, so bail continues until a court calendars one.

AS IT RAN ON THE FRONT

Mitch, investigations. Every caper needs an itinerary, so follow the paper with me: arrest, bail, charge, expel. Four filings, one October.

By Monday the 28th, bail paperwork was already signed and all five were released — the same Monday President Trump told reporters, of London's handling, "I wouldn't have done that," a day after he'd praised the arrest itself. Praise one day, complaint the next, same case file: all together now — that's the whole arc of a single news cycle....

...(cont) Two days later, on September 30th, Prime Minister Andy Burnham told the Washington Examiner there were "indications" Iran "played a part," and defended the bail releases anyway.

Then, on October 3rd, the docket grew three lines at once. First: a 25-year-old UK-Iranian national, arrested separately in what police called a "security incident" near the base, had two London properties searched — and was released on bail, the sixth suspect in the Fairford file, CBS and the New York Post both filing it the same day. Second, the same day, British police charged two Iranian men — not bailed, charged — with plotting a terror attack on Manchester's Jewish community, a separate case entirely, same week, same wire service.

Third beat, same day: the State Department finished removing two Iranian diplomats from New York, the last of them gone Saturday morning after the U.N. General Assembly had already wrapped. They'd been told to leave "days earlier." "Secretary Rubio means business," a U.S. official told the Washington Examiner — "Two more members of the [...]" is where that quote trails off in the wire copy itself; whatever finished that sentence didn't make it into the file we have.

Three case numbers, one month, one country's name recurring in all of them. The UK's bail system processed a sixth Fairford suspect the same day its charging system produced two new Iranian names in an unrelated plot, the same day Washington's expulsion paperwork finally cleared. No one filed these together. The dockets just happen to share a date stamp.

❦ FROM THE CORNER ❦

DUTCH

Five men were arrested near RAF Fairford, bailed the next day, and by October a sixth was bailed too while two more Iranian men were charged in a separate Manchester plot and two Iranian diplomats were finally sent home from New York. That isn't an investigation closing in on anyone, it's a catch-and-release loop with a press office attached. Because the suspects keep walking out the same door they walked in through, and because the base they were arrested near still runs on the same guard rotation it ran last month, the airman's spouse still waves her badge through the Fairford gate every morning on the same honor system that let the vans get that close in the first place.

"They expel two diplomats weeks after the party ended and call it toughness, while six guys tied to a plot outside a U.S.-used air base keep walking out on bail one at a time. That's not a security response, that's a revolving door with a press release stapled to it. Ask what actually changes for the people who live near that base — nothing, because the system's job was never to hold anyone, it was to generate a headline that it did something."

— *Sal*

"Look, the administration finally got tough — two Iranian diplomats, gone, Rubio means business, that's the headline. The bail stuff in London, that's a British court decision, that's not on us, we don't run their system — did I just say we don't run their system, that's not usually my line. The point is the diplomats are out, that's the win, let's focus on that."

$50 — 03 OCTOBER 2026

On who pays

BY LOU
The Word

DEMOCRAT

$46.5 BILLION

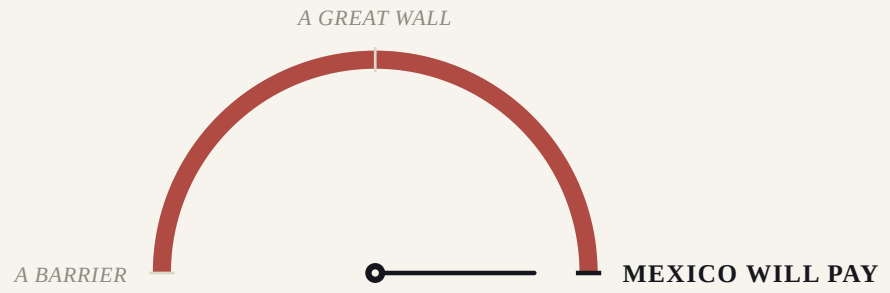

The payer. In March 2016 Mexico's treasury secretary said "Mexico will under no circumstance pay for the wall" [1]. That August, after meeting Mexico's president, Trump said of payment, "We didn't discuss that"; the Mexican president said within hours that he had told him at the start Mexico would not pay [2].

So the bill went elsewhere. The February 2019 plan paired $1.375 billion from Congress, for about 55 miles, with up to $8.1 billion moved from other accounts: $601 million from the Treasury Forfeiture Fund, up to $2.5 billion in counterdrug money, and up to $3.6 billion reallocated from military construction [3]. And the 81 percent of first-term miles that replaced existing barrier, rather than going where none stood [4]. Then the July 2025 law appropriated $46.5 billion for barriers, available through September 30, 2029 [5]. Mexico will pay. The appropriation says who did.

2. "We didn't discuss that"; the Mexican president said he had stated at the start that Mexico would not pay — NPR, 31 August 2016 ↑
3. "$1.375 billion for approximately 55 miles"; $601 million from the Treasury Forfeiture Fund; up to $2.5 billion in counterdrug funds; up to $3.6 billion from military construction — White House fact sheet, 15 February 2019 — American Presidency Project ↑
4. 81 percent of barrier built replaced existing barriers — Government Accountability Office, GAO-23-105443, 5 September 2023 ↑
5. "$46.5 billion … available through September 30, 2029" for border barriers — TIME, 6 August 2026 ↑

REPUBLICAN

MEXICO WILL PAY

The promise, from the announcement in June 2015: "I will build a great, great wall on our southern border and I will have Mexico pay for that wall" [1]. The first half is the part to take seriously, because it happened. By the end of the first term about 458 miles of barrier had been built [2]. Since January 2025, Customs and Border Protection reports 59 new miles of primary wall and 42 of secondary [3].

The case for the wall is that a border is a line and a line needs a barrier, and on miles, the promise delivered something a voter can drive out and touch. The second half of the sentence is the one with a payer in it. That half is on the other side.

SOURCES

1. "I will build a great, great wall on our southern border and I will have Mexico pay for that wall" — campaign announcement, 16 June 2015 — Roll Call / Factba.se ↑
2. About 458 miles of border barrier built, 81 percent of it replacing existing barriers — Government Accountability Office, GAO-23-105443, 5 September 2023 ↑
3. "59 new miles of primary wall and 42 miles of secondary wall" since January 2025, per CBP — TIME, 6 August 2026 ↑

“I'm just going to read the payers, in order. Congress, 2019: one point three seven five billion, about fifty-five miles. The Treasury forfeiture fund: six hundred one million. Counterdrug money: up to two and a half billion. Military construction: up to three point six billion. Congress again, last year: forty-six and a half billion, available through 2029. Sorry — I'm leaving, I'm leaving — that's the whole list. Which line on it is Mexico?” — Lou

“"I will have Mexico pay for that wall." Mexico's treasury secretary said "under no circumstance" in 2016, and they meant it. So the first term paid for it out of military construction money, drug-war money, and a forfeiture fund. Then last summer Congress wrote a check for forty-six and a half billion dollars. Mexico did pay for the wall. Mexico is a code name for you.”

— Sal

“Mexico is paying indirectly, through the economic benefits of a secure border, which show up in the budget under a different heading, the one that says United States.”
