Italy answers a dockworkers' strike against war by deploying troops against them.

BY SAL
Staff Writer

On Oct. 15, in Rome, the World Federation of Trade Unions stood up at a press conference and launched something it called the International Day of Action of Dockworkers and Port Workers Against War and Militarisation. Two weeks later, the plan became a fact on the water.

Oct. 30 arrived, and 113 ports in 22 countries on six continents stopped moving. Workers World called it one of the largest internationally coordinated strikes in world history; the organizers quoted by Common Dreams called it the largest coordinated port action ever, bigger than the day of action they'd run in February. The banners said "We won't work for war" and "Ports for peace — jobs with dignity." The claim was not abstract: the unions said commercial ports fuel militarism, and on Oct. 30 they declined to fuel it.

In Italy, the stoppage did not stay on the docks. A Tribune dispatch that same week described farmers, truckers, students and dockworkers shutting the country down together — the action run under the headline "Blockade Everything," and for once the headline was the inventory. Trucks sat still. Students marched. The docks, already struck, held.

Army Secretary loses Pentagon turf war in August, hired by OpenAI in November to modernize national security

BY STERLING
The Ownership Desk

You will have been told this is a man landing on his feet, and you will want to be pleased for him. Do not be. Nothing here failed. On the thirty-first of August the Army Secretary submitted his resignation after months of turf war with Defense Secretary Pete Hegseth — turf, mind you, not policy — and on Monday OpenAI announced him as senior counselor for national security modernization. A new role, the company says. New: nobody has held the chair before him, so nobody can tell you what the chair is for, beyond how artificial intelligence can be used. Used by whom the announcement does not say.

And what did the company buy? Not a patent. Not a product. The top of the Army and a college friendship with the Vice President — Driscoll is a college friend of JD Vance, as it happens — which is goodwill, the one asset on a buyer's books that cannot be weighed, shipped, or pointed at. Over two months between the resignation and the hire. Two.

The public paid for the chair he sat in ... and was not asked about the chair he sits in now. OpenAI announced the hire in writing, under its own name.

Justice Department answers five court losses by charging 63 voters, seeking sanctions on its own assistant.

BY MITCH
Investigations

The Justice Department told the country that 190,000 people on California's voter rolls were not citizens. That number did not survive contact with a court. All together now, follow the subtraction: 190,000 became 20,000, an eighty-nine percent cut, and an outside account of what remained found four in ten of those names were wrongly flagged. The department built an emergency lawsuit on the smaller number anyway, asking California to set aside ballots from the 20,000 named voters until someone could verify their citizenship — the verifying was supposed to happen after the lawsuit, not before it.

The courts did not agree, in order. On October 27, a federal appeals panel voted 2-1 against the suit. On October 29, a district judge named David Carter — nominated to the bench by a Democratic president — declined the same request. On October 30, a second appeals panel, also 2-1, rejected it again, leaving standing the lower court's finding that the list "isn't credible." Three courts, three refusals; the number stood unvindicated each time.

The Court denied the request. It gave no explanation. It noted no dissents.

Justice Department targets 65 officials for holding ICE accountable, holds none of its own accountable.

BY THE WRECKING CREW
The Enforcement Desk

The chief put one item on the bench before assigning anything: the tool the Justice Department is supposed to carry for days exactly like this one, and asked whether it actually works.

On October 23rd, Minnesota officials told a court the federal government had stopped handing over evidence in their investigation of two fatal ICE shootings, Renee Good and Alex Pretti. Four days later, Pretti's parents said what it looked like from the outside: Trump officials shielding his killers. The planner studied that pause and admired the craftsmanship — stopping a routine evidence transfer takes the same kind of deliberate work as building anything else.

On November 2nd, Truthout filled in the rest of the assembly: since January, the House Judiciary Committee and the Justice Department have targeted sixty-five state and local officials for trying to hold ICE accountable. Not the officers. The people asking about the officers.

Then, on October 30th, a grand jury in Harris County, Texas — a county, not the Department — indicted ICE officer Mario Alberto Morales on a felony

Agency that certified measles eliminated in 2000 is three deaths behind the states it's supposed to count

BY RUTH
The Measles Desk

Run the certificate against the table, hon. The United States certified measles eliminated in 2000: twelve months with no sustained transmission, the federal government's own definition, its own stamp. Measles does not come back on a schedule; it comes back when the count built to keep it out stops being kept. That is the only arithmetic in this column.

On September 1 the Centers for Disease Control and Prevention's weekly outbreak update omitted Pennsylvania's own confirmed measles deaths, the agency citing an investigation into the cause, pending review. On September 15 Pennsylvania's health department raised its count to four, officials calling it the deadliest year for measles since 1992, amid a public feud with the federal health secretary over the outbreak's handling. On October 5 Pennsylvania passed 1,000 cases, its largest outbreak in more than three decades, and the state's own count stood at five deaths. On October 6 Governor Kathy Hochul declared a disaster emergency in New York, citing the Pennsylvania outbreak and a rising count in New York's own rural counties. On October 13 Pennsylvania announced a sixth death.

Stevens calls it sexist to suggest her fiancé's vote swayed her, six days after he announced that vote.

BY LOU
One More Question

I called the library today about my card — it renews itself automatically, except this year it didn't, and the recording wants me to press 2 for circulation, and circulation wants the branch downtown, and the branch downtown puts me back on the same recording. So I'm standing in the hallway with the phone against my ear and a folder of pages I printed last week and never got around to, because the dog wanted out and then it started raining and I only own the one coat.

That's how I ended up looking at the Michigan Senate race while I waited for a person.

Here's what's in the folder, in the order it happened. Wednesday the 28th, The Hill reports that Jason Turkish — Congresswoman Haley Stevens's fiancé — says he's voting for Mike Rogers over Abdul El-Sayed, and accuses El-Sayed of language he calls antisemitic. The next day, the 29th, the Washington Examiner runs what reads like the same interview — same Wednesday, Turkish saying El-Sayed makes the Jewish community less safe — a second paper picking up what the first one already had. I mention that only because

White House rules out Iran strikes before the midterms, authorizes one the night before.

BY RUTH
The Money Desk

The promise had a date on it. On October 8th, Trump said the United States would not strike Iran before the midterms, citing what he called productive discussions with Tehran. The war's accounting had a date on it too. In July the Congressional Budget Office put its cost near forty billion dollars and called that conservative; in August the Pentagon gave Congress a separate figure, just over forty-two billion. By October 28th, the day Trump told a Lubbock rally "you'll see Iran in a couple of weeks," the price tag had climbed again, to forty-seven billion. The Pentagon has not itemized which names moved in the two weeks between those two numbers.

On the eve of the midterms, Trump told reporters Iran wants a settlement, as soon as possible. Officials called the strike defensive. Officials said there were no immediate plans to escalate.

Reconcile the two columns and the gap is not the target; the island had coordinates, the strike was public, the officials gave their reasons on the record. The gap is the calendar. In October the war was a thing that would wait for the vote. By November it was a thing the vote waited for. The five bil-

Army Secretary loses Pentagon turf war in August, hired by OpenAI in November to modernize national security

By **STERLING**
THE OWNERSHIP DESK

"OpenAI hires ex-Army Secretary Dan Driscoll two months after Pentagon exit", 3 November 2026 (PHOTO VIA WASHINGTON EXAMINER — THE ORIGINAL REPORT)

■ **THE SHORT VERSION**
typed by Dot

WHAT HAPPENED. Dan Driscoll resigned as Army Secretary, then joined OpenAI as its senior counselor for national security modernization.

WHO GETS PAID. OpenAI, which now has the Army's former civilian chief advising it on national security work.

WHAT SLIPS. Nothing slips here yet.

WHAT'S NEXT. CBS reported on September 1 that more high-profile Pentagon exits were expected after this one. Each exit is a hire somewhere, and the seat OpenAI filled did not exist until Monday.

AS IT RAN ON THE FRONT

You will have been told this is a man landing on his feet, and you will want to be pleased for him. Do not be. Nothing here failed. On the thirty-first of August the Army Secretary submitted his resignation after months of turf war with Defense Secretary Pete Hegseth — turf, mind you, not policy — and on Monday OpenAI announced him as senior counselor for national security modernization. A new role, the company says. New: nobody has held the chair before him, so nobody can tell you what the chair is for, beyond how artificial intelligence can be used. Used by whom the announcement does not say.

And what did the company buy? Not a patent. Not a product. The top of the Army and a college friendship with the Vice President — Driscoll is a college friend of JD Vance, as it happens — which is goodwill, the one asset on a buyer's books that cannot be weighed, shipped, or pointed at. Over two months between the resignation and the hire. Two....

...(cont) The public paid for the chair he sat in ... and was not asked about the chair he sits in now. OpenAI announced the hire in writing, under its own name. Nothing was hidden.

Down the lane the fox goes now.
That farm keeps no dog yet.

— ENOCH
The Ownership Desk

"Dan Driscoll loses a fight with Pete Hegseth, walks out of the Pentagon at the end of August, and on Monday OpenAI puts him on the payroll as senior counselor for national security modernization. We paid for every day of his education in that job, and the outfit that hired what he learned never had to ask us a thing. Nobody broke a rule — the rule is the deal."

— Sal

"He is a private citizen now. Did I say private? He is a — look, the man resigned in August, that is over two months, which is longer than most people wait, and there is no rule against any of it. If there were a rule he would have followed the rule, because he follows rules. That does not sound like me."

— Chip

SANCTIONS SOUGHT

Justice Department answers five court losses by charging 63 voters, seeking sanctions on its own analysts.

By MITCH
INVESTIGATIONS

"Supreme court rules against Trump over bid to force California to set aside ballots", 3 November 2026 (PHOTO VIA THE GUARDIAN — THE ORIGINAL REPORT)

AS IT RAN ON THE FRONT

The Justice Department told the country that 190,000 people on California's voter rolls were not citizens. That number did not survive contact with a court. All together now, follow the subtraction: 190,000 became 20,000, an eighty-nine percent cut, and an outside count of what remained found four in ten of those names were wrongly flagged. The department built an emergency lawsuit on the smaller number anyway, asking California to set aside ballots from the 20,000 named voters until someone could verify their citizenship — the verifying was supposed to happen after the lawsuit, not before it.

The courts did not agree, in order. On October 27, a federal appeals panel voted 2-1 against the suit. On October 29, a district judge named David Carter — nominated to the bench by a Democratic president — declined the same request. On October 30, a second appeals panel, also 2-1, rejected it again, leaving standing the lower court's finding that the list "isn't credible." Three courts, three refusals; the number stood unvindicated each time.…

…(cont) The Court denied the request. It gave no explanation. It noted no dissents. That is the entire record — a court of nine looked at the department's numbers and said nothing, which leaves the lower courts' finding exactly where it was: the list isn't credible.

That same Monday, not the day after, the department announced something else: 63 more people, across 15 states, charged with voting-related crimes — illegal voting, fraudulent registration, false claims of citizenship. It did not revise the number again. It did not explain the four in ten. It reached for the only lever a losing filing has left and pointed it at someone else — the 63 newly charged, and the analysts who did the subtraction from 190,000 to 20,000 in the first place, the same analysts the department is now asking a court to sanction for their arithmetic.

The document's answer to being wrong, five times running, is to charge more people and punish whoever counted. The number shrank by 170,000. The prosecutions grew by 63. The department has not said which direction was the mistake.

FROM THE CORNER

Dutch

They lost the twenty-thousand number in five courts and a sixth said nothing at all, and Monday they charged sixty-three voters and asked a judge to sanction the analysts who did the subtraction. That isn't an election-integrity unit, it's an audit of the auditors, built to teach every clerk in the country what happens to people who do the math in public. Because the analysts who got it right are the ones facing sanctions, the next count anywhere gets done quietly, and the first registration that doesn't square with somebody's spreadsheet is the one sitting in your kitchen drawer with your name on it.

"They had a number, it got cut by 170,000 and a court or five told them the rest was garbage too — and they still couldn't let it go. This was never about twenty thousand ballots, it's about who gets to call an election stolen with a spreadsheet, and when the spreadsheet fails, you don't fix the spreadsheet, you indict the guy who checked it. That's the tell: you lose on the facts, so you make the facts a crime."

— Sal

"Look, sixty-three new voting-crime cases the day before an election shows the Department takes integrity seriously, full stop — the court losses are a separate, unrelated procedural matter. The sanctions request against the analysts isn't punishment, it's quality control on their methodology, which is — did I just say the Department wants to sanction the people who got the count right? That's not the point I was making."

— Chip

Justice Department targets 65 officials for holding ICE accountable, holds none of its own accountable.

By THE WRECKING CREW
THE REMEDY DESK

"ICE officer indicted in Texas after striking immigrant with vehicle", 30 October 2026
(PHOTO VIA THE HILL — THE ORIGINAL REPORT)

AS IT RAN ON THE FRONT

The chief put one item on the bench before assigning anything: the tool the Justice Department is supposed to carry for days exactly like this one, and asked whether it actually works.

On October 23rd, Minnesota officials told a court the federal government had stopped handing over evidence in their investigation of two fatal ICE shootings, Renee Good and Alex Pretti. Four days later, Pretti's parents said what it looked like from the outside: Trump officials shielding his killers. The planner studied that pause and admired the craftsmanship — stopping a routine evidence transfer takes the same kind of deliberate work as building anything else....

...(cont) On November 2nd, Truthout filled in the rest of the assembly: since January, the House Judiciary Committee and the Justice Department have targeted sixty-five state and local officials for trying to hold ICE accountable. Not the officers. The people asking about the officers.

Then, on October 30th, a grand jury in Harris County, Texas — a county, not the Department — indicted ICE officer Mario Alberto Morales on a felony count of aggravated assault with a deadly weapon, for allegedly driving his SUV into Miguel Parra, a man who had lived in the state for decades and spent weeks afterward in the hospital. Washington didn't ask Harris County to do this. The county reached for the plain tool every county already owns and used it on a federal officer exactly the way it uses it on anyone else. The tinkerer took the whole mechanism apart afterward just to check: a grand jury hears what happened, decides a crime occurred, indicts. No new law required. No list of sixty-five. It's the one gear in this machine that still turns when you crank it.

On Monday, Morales turned himself in and was released on bond — a year-plus into the job, NBC noted, in the middle of what reporters are calling Trump's hiring surge, now itself under review. The muscle's job here was simple: clear away the obstruction — the stalled evidence, the sixty-five names — so the pilot could see what was actually left standing. One grand jury. One county. Zero help from the agency whose whole job this is supposed to be.

The Justice Department owns the identical tool — authority to prosecute, the practice of sharing what it collects with the states doing the same work. It used neither this year. Harris County used its copy without waiting to be asked. The fix the crew is pricing out isn't exotic: give the Department the same orders it already gave the county, for free, with no memo required.

❦ FROM THE CORNER ❦

DUTCH

A Harris County grand jury, not the Justice Department, is the only body that has indicted an ICE officer all year, and it did it without Washington asking. That isn't federal law enforcement overseeing itself, it's federal law enforcement outsourcing its own oversight to whichever county still bothers to pick up the phone. Because the Department stopped handing Minnesota its own files on two people its agents shot dead, the next county has to build its case the same lonely way Harris County just did, which means the next local official who asks ICE a hard question is the one who ends up on a list — like the name on your town's sign-up sheet for Tuesday's public comment.

"They spent the year building a list of sixty-five people for the crime of asking ICE questions, and when ICE's own guy ran a man down with his SUV, it took a Harris County grand jury to do a single thing about it — not them. That's not law enforcement overseeing itself, that's a department running interference for its own team while fining the referees. Guy in Houston's out of the hospital after weeks, and the officer was out on bond by Monday; tell me again who that system was built to protect."

— Sal

"Look, the system worked exactly as designed — he was indicted, he turned himself in like a responsible citizen, bond was set, that's due process functioning beautifully. The sixty-five officials situation is completely unrelated, that's about the rule of law, you can't just let local officials run around undermining federal — well, they were asking questions, which, I mean, that's — did I say undermining? That's not — okay, I'll need to circle back on that one."

— Chip

Stevens calls it sexist to suggest her fiancé's vote swayed her, six days after he announced that vote.

By LOU
ONE MORE QUESTION

'Haley Stevens to campaign with Abdul el Sayed in final stretch of Michigan Senate race', 30 October 2026 (PHOTO VIA WASHINGTON EXAMINER — THE ORIGINAL REPORT)

▪ THE SHORT VERSION
typed by Dot

WHAT HAPPENED. Rep. Haley Stevens endorsed Republican Mike Rogers for Senate, then called it sexist to suggest her fiancé's vote swayed her.

WHO GETS PAID. Mike Rogers's Senate campaign and Michigan Republicans gain a cross-party endorsement in the race's final days.

WHAT SLIPS. A reporter's ability to question a politician's own explanation, without the question being dismissed as sexist, slips here.

WHAT'S NEXT. If the caucus removal holds, a primary challenge may follow; that is what Wyoming Republicans got after censuring Liz Cheney on 4 February 2022: a 66-to-29 primary loss that August.

AS IT RAN ON THE FRONT

I called the library today about my card — it renews itself automatically, except this year it didn't, and the recording wants the press 2 for circulation, and circulation wants the branch downtown, and the branch downtown puts me back on the same recording. So I'm standing in the hallway with the computer against my ear and a folder of pages I printed last week and never got around to, because the dog wanted out and then it started raining and I only own the one coat.

That's how I ended up looking at the Michigan Senate race while I waited for a person.

…(cont) Here's what's in the folder, in the order it happened. Wednesday the 28th, The Hill reports that Jason Turkish — Congresswoman Haley Stevens's fiancé — says he's voting for Mike Rogers over Abdul El-Sayed, and accuses El-Sayed of language he calls antisemitic. The next day, the 29th, the Washington Examiner runs what reads like the same interview — same Wednesday, Turkish saying El-Sayed makes the Jewish community less safe — a second paper picking up what the first one already had. I mention that only because I almost read it as two separate days, and it isn't; it's one remark, in two papers.

Two days later, the 30th, the Examiner has Congresswoman Stevens committing to campaign with El-Sayed for the final stretch — her former primary rival. The 31st, Common Dreams has El-Sayed answering a demand from Stevens that he apologize over his Israel comments, and saying he's staying focused on beating Rogers. So as of Halloween, by what's in my folder, the congresswoman was on the trail with El-Sayed, two days after her fiancé's statement ran in print.

Monday — and I'll go fast here, since another edition already walked through it — Rogers puts out a video promising no federal abortion action, Stevens endorses him anyway, and by that night the House Republican caucus has moved her out. I'm not retracing that part. What's new is today.

Today the Examiner has Congresswoman Stevens calling it sexist — her word — that anyone would suggest her fiancé's vote had anything to do with her endorsement. Today's folder also has Michigan's Democratic Party chair, on CBS, saying she lied to her own constituents, and the vice president, on Fox, saying her endorsement will "certainly" help and give certain voters "permission." Three descriptions of the same Monday, filed the same Tuesday.

Here's a small demonstration. When I write a check at the bank down the street, it clears, and it's on the ledger whether I bring it up at dinner or not. The teller doesn't ask me if the check counted or whether the bank's in on it. Counted the moment it cleared, same as Turkish's answer counted the moment the paper printed it, on the 28th.

So here's as far as I got before the branch finally picked up: her fiancé's vote was in print six days before she called the suggestion sexist. Was there a day between the 28th and the 2nd when her household was on the record for two different candidates in the same Senate race, or was there not, don't put me back on hold yet — is that the same six days she's calling sexist?

"Her own fiancé put his vote on the record a week before the election, in his own name, in two different papers — and now it's sexist to notice the timing? Nobody made him give that interview. She didn't get bounced from the caucus because her fiancé has opinions; she got bounced for using the six days after his opinion to go find her own."
— Sal

"She's a grown congresswoman who read the campaign ads and made up her own independent mind — this has nothing to do with who she's marrying. Her fiancé is a separate, independent person with his own separate, independent reasoning, which is just how two independent people land on the same candidate six days apart. Did I call that a coincidence? Forget I said that."
— Chip

Stevens rejects claims her fiance influenced Rogers endorsement as 'sexism'
Washington Examiner | RIGHT | *22:48 EST*

Rep. Haley Stevens (D-MI) rejected claims that her fiance, Jason Turkish, played a role in her last-minute decision to endorse Michigan Republican Senate nominee Mike Rogers, calling the speculation sexist. Stevens, who flipped her endorsement to Rogers over Democratic nominee Abdul el Sayed two days before the midterm elections and left…

Stevens shares rationale for endorsing Rogers over El Sayed
The Hill | MAINSTREAM | *22:33 EST*

Rep. Haley Stevens (D-Mich.) shared her rationale for her recent decision to endorse former Rep. Mike Rogers (R-Mich.) over Democrat Abdul El-Sayed in the state's contested Senate race, citing campaign ads, among other reasons.

This page is a back-issue: the story as it ran, receipts as they were. The current edition is at the front. The byline is a pen name for a column drafted by a machine and checked by the editor; how this is made.

EVE OF THE VOTE

White House rules out Iran strikes before the midterms, authorizes one the night before.

By RUTH
THE MONEY DESK

"As US and Israel Plot Iran Escalation, Regional Powers Scramble to Avert It", 31 October 2026 (PHOTO VIA TRUTHOUT — THE ORIGINAL REPORT)

■ **THE SHORT VERSION**
typed by Dot

WHAT HAPPENED. The United States struck Iran's Qeshm Island the night before the midterms, after promising no strikes until after the vote.

WHO GETS PAID. The Pentagon, whose own price tag for the war climbed to $47 billion by the day of the strike.

WHAT SLIPS. Voters went to the polls without a vote on the war itself or an itemized account of why its cost kept rising.

WHAT'S NEXT. If Congress holds no vote on this war either, that is what happened after Libya in 2011: the House rejected authorization 123 to 295 on June 24, and the bombing campaign ran four more months anyway.

AS IT RAN ON THE FRONT

The promise had a date on it. On October 8th, Trump said the United States would not strike Iran before the midterms, citing what he called productive discussions with Tehran. The war's accounting had a date on it too. In July the Congressional Budget Office put its cost near forty billion dollars and called that conservative; in August the Pentagon gave Congress a separate figure, just over forty-two billion. By October 28th, the day Trump told a Lubbock rally "you'll see Iran in a couple of weeks," the price tag had climbed again, to forty-seven billion. The Pentagon has not itemized which lines moved in the ten weeks between those three numbers.

On the eve of the midterms, Trump told reporters Iran wants a settlement, as soon as possible. Officials called the strike defensive. Officials said there were no immediate plans to escalate....

...(cont) Reconcile the two columns and the gap is not the target; the island had coordinates, the strike was public, the officials gave their reasons on the record. The gap is the calendar. In October the war was a thing that would wait for the vote. By November it was a thing the vote waited for. The five billion dollars that moved between the Pentagon's August figure and its October one moved in the same stretch Trump spent promising the war itself would not move at all.

Call that a coincidence, hon, and you still owe an itemized answer for where the five billion went.

FROM THE CORNER
DUTCH

THE WHITE HOUSE SAID NO STRIKES BEFORE THE MIDTERMS, THEN STRUCK QESHM Island the night before the vote and logged it as defensive. That isn't a ceasefire with a deadline, it's a war timed to outlast the one promise anyone wrote down. Because the promise only had to survive until the polls opened, and because the Pentagon's own price tag moved five billion dollars with no line attached to it, the next bill comes off the same ledger as the tax notice already printed with your name on it.

"They said no war talk till after you voted, then hit Iran the night before you did, and called it defense. That's not a ceasefire, that's a campaign schedule with missiles attached. Same week the bill for this thing jumped five billion dollars, and the Pentagon still can't say which line it hit."
— Sal

"The president never said no strikes after the midterms started — Monday night is technically still before Tuesday, so the promise held to the letter. And calling it defensive is accurate: radar, launchers, nothing offensive about defending installations that happen to sit on election eve. Did I just say election eve? That's not the point I meant to make."
— Chip

President who pledged to avoid foreign wars trades stock in companies profiting from the one he started

By THE LODGERS
THE EURO DESK

"Trump promised 'no more wars'. His foreign policy tells another story", 2 November 2026
(PHOTO VIA FRANCE 24 — THE ORIGINAL REPORT)

■ **THE SHORT VERSION**
typed by Dot

WHAT HAPPENED. The Iran war's official cost rose to $47 billion on October 28, 2026.

WHO GETS PAID. Energy companies whose stock rose with the war get paid, and Trump's own second-quarter disclosure shows he holds shares in them too.

WHAT SLIPS. The one check that could set the war's price or end it, a vote in Congress, never happens here.

WHAT'S NEXT. If Congress holds no vote, the war keeps running on its own authority; that is what Washington got after December 24, 2025, when the 2001 war authorization was still in force.

AS IT RAN ON THE FRONT

Today we are making a war that was promised over, which is not a dish you get over here, so I shall go slowly. You will need a campaign promise, a price tag still climbing, and a president with money riding on the outcome.

You will need, exactly: forty-seven billion dollars, the Iran war's official cost as of October 28th; over a thousand stock trades made in June, some in energy firms; and a September report crediting the whole foreign policy with saving taxpayers three hundred twenty billion dollars over four years. Keep all three on the counter; do not let them touch yet....

Clive *Invested. I have backed my own work more than once, and no one here has matched a poet for commitment to a losing position.*

Gary *Invested is one word for it. I invested an evening in Keith's door, which no longer exists — the only return this house has seen.*

In October, the Pentagon had moved troops out of the hemisphere where it claims no oil and into the one where it claims thirty-five percent, seating its largest contractor on the committee planning the future of war. You will be looking for the vote. There is none; there is a committee, and the contractor sits on it.

Rob *No vote. Nothing in this house gets voted on either, and nobody asks what happens to the lentils when the gas goes off midsimmer.*

Keith *Nobody asks because I tell you anyway. If the gas is off that's a supply problem, and I know men who'd pay to say so first.*

Now to today. France 24 counted it on November 2nd: wars still running under a president who promised to end them — Iran priced near forty-seven billion dollars, Venezuela's oil thirty-five percent claimed by the Pentagon, diesel above four dollars a gallon from the fighting. At a rally in Texas, a week before the midterm elections, the president said of the Iran war, "It can be over whenever I want it to be over." His own disclosure, filed for the second quarter, showed stock bought in energy firms posting record profits from it, in a quarter when the fighting paused for a ceasefire, then restarted.

The paper on the table today has it as a broken promise: "Trump promised 'no more wars'. His foreign policy tells another story," reads the France 24 headline. At home, the Hill had it as savings: "Trump's foreign policy saves taxpayers $320 billion over 4 years." Both figures sit on the counter; I am not adding them for you.

Gary *Add them up yourself. That's rich from a kitchen that hasn't settled its own meter this quarter, and nobody's rushing to add that up either.*

Keith *Settled. I could settle the meter by Thursday if someone let me sell the rights to how we got here.*

This serves the energy firms whose stock rose with the war, and the contractor on the committee planning the next one. The tab, forty-seven billion dollars so far, goes to the taxpayer and the pump, not the president.

Clive *Doesn't go to the president. There's a first. I'll put that in the poem too, right after the part about things that never come back to the one who started them.*

"He swore off these wars on the trail, then the filing shows him trading stock in the oil companies getting rich off the one he kept running. That's not a coincidence, that's a financial disclosure. Forty-seven billion and climbing, and he's got a piece of it."
— Sal

"Look, those are routine quarterly disclosures every official files, this isn't about any one trade — and the foreign policy report shows three hundred twenty billion saved, so if anything we're under budget. Did I say under budget? There's a war on, nobody's under budget."
— Chip

Trump promised 'no more wars'. His foreign policy tells another story

France 24 MAINSTREAM § *16:34 EST*

Donald Trump promised an "America First" foreign policy and pledged to keep the US out of foreign wars. But since returning to the White House, his administration has been deeply involved in conflicts around the world.

But: **The Pentagon has failed its audit eight years running — the only major federal agency never to pass one** *Military Times, 19 December 2025*

Official Price Tag of Iran War Jumps to $47 Billion as Trump Says It Will End 'Whenever I Want It To'

Common Dreams § *05:05 EDT*

US President Donald Trump told a crowd of his supporters on Tuesday that his illegal war of choice in Iran will end "whenever I want it to" as the conflict's official price tag reportedly jumped to $47 billion—a figure that independent analysts believe to be a dramatic underestimate. "It can be over whenever I want it to be over," Trump...

§81 — 03 NOVEMBER 2026

On Election Day

BY LOU
The Word

DEMOCRAT

23RD OF 38

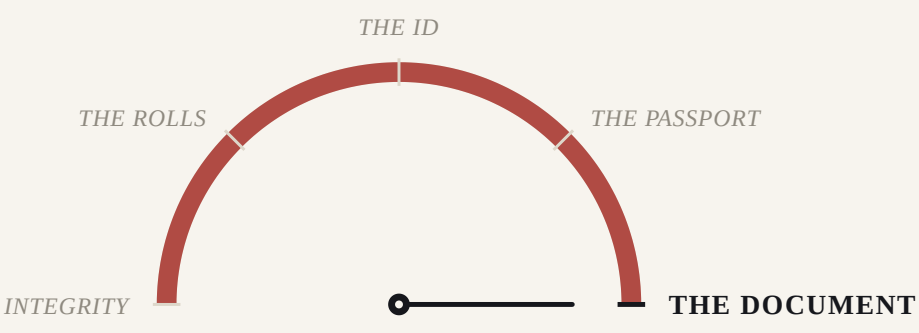

Before any of this year's laws, the oldest obstacle was the date itself. The United States ranks 23rd of 38 OECD countries in voter turnout, and most of the countries above it vote on a weekend or on a declared public holiday [1]. More than sixty percent of elections worldwide are held on a weekend, Sunday most commonly [2]. Twenty-six percent of Americans who did not vote gave the reason as being too busy — work, school, obligations [1]. An analysis of thousands of international elections found turnout rises on average five to six points when a national election moves from a weekday to a rest day [2].

So the fix is known, it is measured, and it has been introduced: the Election Day Act would make today a federal holiday, and no bill of its kind has ever cleared Congress [3]. Tuesday was chosen in the 1840s around a farm calendar and a day's travel to the county seat. It has outlived the horse. Both of today's files are about how many hours a person has to spend to cast one vote — and only one of the two got a legislature's attention this year. Polls are open. Go stand in the line.

SOURCES

1. The United States ranks 23rd of 38 OECD countries in turnout, most of which vote on a weekend or national holiday; 26 percent of American nonvoters reported being too busy because of work or school — Institute for Responsive Government, What Other Countries Can Teach Us About Turnout ↑
2. More than 60 percent of elections worldwide are held on a weekend, Sunday most commonly; an analysis of thousands of international elections found turnout rises five to six points on average when polling moves from a weekday to a rest day — The Conversation ↑
3. The Election Day Act, H.R. 154, 119th Congress, would establish Election Day as a federal holiday; no bill of this kind has cleared Congress — Congress.gov ↑

REPUBLICAN

THE DOCUMENT

The case for tightening is that a vote counted wrong cancels a vote cast right, and no one who has ever run an election disputes that the rolls need maintaining. What is worth putting on the record today is the size and speed of what was actually enacted. Between 1 January and 1 May 2026, at least nine states enacted twelve restrictive voting laws, nine of which are in force at the polls today [1]. Seventeen states enacted thirty-two such laws across 2025, of which thirty-one are in effect for this election [2].

The sharpest of them is documentary proof of citizenship. South Dakota and Utah now require every registrant to produce a document such as a passport or a birth certificate; Florida, Kentucky and Mississippi require it of some voters [1]. A passport is a document a person acquires only if they travel, and a birth certificate is one many people have to send away for. That is the trade being made, and it should be named honestly: a paper requirement at the front of registration, paid for in the registrations that do not happen.

SOURCES

1. At least 9 states enacted 12 restrictive voting laws between 1 January and 1 May 2026, 9 in effect for the November election; South Dakota and Utah require documentary proof of citizenship from all registrants, and Florida, Kentucky and Mississippi from some voters — Brennan Center for Justice, State Voting Laws Roundup: May 2026 ↑
2. 17 states enacted 32 restrictive voting laws in 2025, 31 of them in effect for the 2026 midterms — Brennan Center for Justice, State Voting Laws Roundup: 2025 in Review ↑

“Election Day. I've got two files and they're both about how hard we make this. First file: we vote on a working Tuesday, more than sixty percent of elections worldwide are on a weekend, we come in twenty-third of thirty-eight in turnout, and twenty-six percent of nonvoters said they were too busy with work or school. Move it to a rest day and the research says turnout goes up five or six points. Second file: nine states passed twelve new restrictions in the first four months of this year, on top of thirty-one from last year still in force today. Sorry, one thing before you go. The first file is a problem nobody fixed in two hundred years. The second one took eighteen months. We move fast when we want to.” — Lou

🍺

“It's Tuesday. Go vote. And while you're standing in that line on your lunch break, remember that we're the ones who picked Tuesday — a farm calendar from the eighteen hundreds, kept because nobody ever moved it. Sixty percent of the world votes on a weekend. We rank twenty-third out of thirty-eight. A quarter of the people who don't vote say they were at work. There's a bill to make today a holiday. There's always a bill. Go vote anyway, that's the whole point, they're counting on the line being annoying.”

— Sal

🚬

“Election Day has been Tuesday since 1845 and that continuity is part of what makes it meaningful, and I'd add that if someone genuinely cannot find time to vote across a two-week early voting window, the issue may be one of priorities rather than of access.”

— Chip
